Cleaning up the Ends of

WALL PAPER

WAR SUMMARY OF THE LATEST EVENTS

The German drive towards Ypres through the Sanctuary Wood and northwesterly between Zillebeke and Hooze continues. The British Headquarters report states that in the fighting of Tuesday the enemy succeeded in capturing the British front line trenches running through the village of Hooze. Attacks against other portions of the line failed. Unless a change has been made recently, the Canadians hold the front as far north as Hooze. In the determined assault of Friday last the Germans pierced the line to the southeast of Zillebeke, but failed at Hooze. Some of the accounts of the battle speak of Canadian Highland regiments from the Hooze sector coming to the aid of the hard-pressed men on the Zillebeke front. To make effective the German grip to the south it was vital that the British front at Hooze should be pushed back. This has been done, and now a strip of territory measuring about two thousand yards in length by from three hundred and fifty to seven hundred yards in width, which a week ago was held by the Canadians, is either a No Man's Land or is held by the enemy. The struggle for this bit of ground, of no great military value, has probably cost Canada between four and five thousand casualties, and the Germans, it is estimated, at least eight thousand.

Russia's operations in Volhynia and Galicia are upon a great scale, and have already had great results. An official Petrograd report states that the total number of prisoners thus far captured between the Pripiet marshes and the Roumanian frontier is 900 officers and 40,000 men. The guns taken number 77, the machine guns 134 and the trench mortars 49. It is evident that along a wide stretch of front the Austrian defence has been crumpled up. Brusiloff, the Russian Commander-in-Chief, is all for secrecy.

WHAT THE COUNTY COUNCIL IS DOING

Met in the Council Chamber in the Court House on Tuesday.

Passed a resolution of condolence to Reeve Hicks of North Fredericksburgh in the death of his son, Pte. Ray Hicks.

Passed a resolution of condolence to the widow and family of the late Fred Shepard.

Received an application from Samuel Ryan to be appointed High County Constable. Referred to Police Committee.

Heard the Warden and Clerk's report of orders given on Treasurer and confirmed same.

Received the report of the County Patriotic Committee, showing present monthly payment to be \$1472.01, to 116 dependents of the soldiers and moved a vote of thanks to the Executive Committee for their work.

Received copy of order in council, ordering payment to county of \$5208.34 from Province on account of county roads.

Received communication from Provincial Government re expenditures on roads in 1916. The balance of the first session was taken up with County Road discussion.

WEDNESDAY MORNING.

Referred a number of accounts to various committees.

Council took up the By-Law to grant aid to the Canadian Patriotic Fund, and gave it its second reading. The money, \$18,000.00 will be raised this year by an extra 2 1/2 mills taxation.

A claim from Mr. R. Shetler for damages to a horse, was referred to the Roads and Bridges Committee.

Mr. G. B. Curran was heard in reference to Agricultural school fair work and County Boards of Agriculture.

WEDNESDAY AFTERNOON.

Frank Hughes presented a claim for \$5 for damages to buggy on County Road. Referred to Road and Bridges Committee.

A number of communications were read and filed.

Col. Ferguson, Major Gray, Capt. Hannah and Lieut. Graham, of the 146th Batt., addressed the Council, asking a grant to help the battalion in their recruiting campaign.

After some discussion the Council voted the 146th Batt., \$1500. Col. Ferguson and Capt. Hannah, on behalf of the 146th Batt., heartily thanked the Council for the grant.

The Patriotic Fund By-Law was finally passed granting \$1800.00 per month for 10 months.

A large number of claims for damages to vehicles on county roads were referred to Roads and Bridges Committee.

months, but have not tried to locate heavy artillery on the ridge, as the result would be the concentration of

ROAD BY-LAW TO BE ON MONDAY, JUN

The Town council are people to sanction a By-lawing the raising by debenture 000.00 to build certain roads signated in a former letter. pal roads proposed to be bu main roads leading into to the Newburgh Road, the and centre street and the road. It will not be necess anything further about th of these roads as the citizer aware that they are in condition and dangerous and the town has already had to pay damages for thereon. The council find cannot build these roads usual street appropriation take all the available money purposes to build and ma other roads in the town will therefore be necessary ize a certain portion of t street appropriation to b roads and once they are bu of maintaining and keeping repair will be a very small the town and it will be qui to reduce the annual street tion by at least \$1000.00 fo following years. This amo used to pay off the debent year for the next ten year means there would be prac increase in the rate of tax would have the use of g which are not only a great co for people coming to town credit to the town. The co every reason to believe th ernment will bear forty p the cost of constructing th that front on Farm lands tl about 1 8/10 miles of this clai This would bring back to about \$2500.00 which amou applied against the total am posed to expend and in pla ing to issue debentures fo we would only require t about \$7500.00. Several ques arisen among the citizens a class of road is proposed, l are to be constructed and have charge of the actual l and building of these r answer to these questions say that the council propos what the government engi pass as permanent Macad. The roads to be from fourtee teen foot wide with about a depth of stone and substanti tions. Proper surface drai be provided in all cases a necessary title drainage wi vided along the sides of th The government road de have agreed to send their roe er to lay out the work and it is properly constructed an also have the advice and ass Mr. Anderson, the county The council have also decide this work in charge of the builder they can secure and at present considering sev

WALL PAPER

After an unusually successful Wall Paper season we find we have quite a number of ends we will dispose of very cheaply.

We also have several lines of expensive paper that has been too good in quality for the general public that we are reducing in price.

and the trench mortars 49. It is evident that along a wide stretch of front the Austrian defence has been crumpled up. Brusiloff, the Russian Commander-in-Chief, is all for secrecy. He is reported to have sent the newspaper correspondents back to Petrograd before he started his drive, and as his official despatches do not indicate where he has delivered his hammer strokes, the world must wait with unsatisfied curiosity till he lifts the veil. Vienna admits a retirement toward Lutsk. This city and the important railway centre of Kovel, farther to the west, are doubtless Brusiloff's immediate objectives.

Is Fort Vaux in German hands? The Germans say that "in all its parts" it has been in their possession since Tuesday night. The midnight Paris report says: "The Germans announced to-day that Fort Vaux fell into their hands during the evening of the 6th of June. On the 7th, at 3 o'clock in the morning, Fort Vaux was still in our hands. From that time on, due to the violence of the bombardment, we have not been able to establish any communication with the fort."

The Fort of Vaux is one of the most important of the outer defensive works of Verdun on the east side of the Meuse. From Douaumont and Vaux the land falls in an abrupt slope to the northeast. Up this slope during the early stage of the operations in February the Germans made their way by charging in solid masses. They reached Douaumont, and after it had been hammered out of all resemblance to anything but an abandoned stone quarry they took it. The French established new lines a few hundred feet to the southwest, and there they have held their positions ever since. They even retook portions of Douaumont a couple of weeks ago, and held them for several days. Vaux has been battered as Douaumont was, but the French garrison clung to it, despite the devastating artillery fire, because from the heights on which it stands command is held of the valley to the north between it and Douaumont, and artillery spotters stationed on the heights of Vaux in observation posts can direct a deadly fire on German concentrations on the plain to the east as well as the adjacent slopes to the north and northwest. If Vaux is taken the Germans will use it for the same purpose as the French did, viz: as an observation station. The situation is too conspicuous for the mounting of big guns. The Germans have had Douaumont for over three

months, but have not tried to locate heavy artillery on the ridge, as the result would be the concentration of all the French guns within range on the spot and the slaughter of any gunners who tried to work artillery there. This applies with equal force to Vaux.

The capture of Fort Vaux will not materially change conditions. It gives the Germans encouragement, and adds to their spectacular gains, but the foe is still five miles from Verdun, and the great earthworks and defences of Fort de Souville and Fort de Tavannes—more formidable natural positions than Fort Vaux—bar the way. If these positions are defended as the Douaumont and Vaux heights have been the Germans will lose another army in taking them. Even then, nearer the city, and lying between it and Fort de Souville, are the Belleville and St. Michel forts. They are of no use as fortifications, but the heights on which they stand provide natural defensive positions of the same sort as Hill 304 and Dead Man's Hill, on the other side of the Meuse, which the French have held for months against constant attack by great German forces. If, therefore, the retention of Verdun has become a matter of national pride for France, the fall of Fort Vaux will have little result. It is important, but by no means vitally important, to the defence.

Mr. Balfour, first Lord of the Admiralty, speaking Wednesday before the Imperial Council of Commerce in London, said: "Anyone who imagines that the relative strength of the two fleets is the same as it was before the battle has made the most profound mistake. The German navy is relatively and absolutely less powerful than is the British navy." Mr. Balfour added that the dream of a German invasion of Great Britain would be dissipated forever by the action, and that the blockade could now be tightened. Mr. Balfour is exceedingly cautious in his use of words. His statements can be accepted at their face value. When he says "Great Britain not merely obtained the honors of the battle, but also gained the substantial fruits of victory," the people of the Empire will accept his judgment unreservedly. The Kaiser, in continuing to brag of victory while concealing Germany's losses, is merely making himself ridiculous.

Berlin officially announces the rescue by German light cruisers and destroyers of 176 officers and men from sinking British vessels during the North Sea battle. About a hundred and fifty of them were from two destroyers, the Nestor and Nomad. From the Queen Mary two were saved, and from the Indefatigable two.

The Italians begin to come back. Rome records not only the repulse of Austrian attacks northeast of Asiago, with heavy enemy losses, but a vigorous Italian counter-attack with the bayonet that drove the Austrians from the Heights of Campo Mulo. The peasants of Venetia may safely return to their homes. Austria has got a new and difficult task in Galicia and Volhynia, and will not be able to concentrate her strength on an invasion of Italy.

The penetration of German East Africa by columns from the north, the west, the southwest and the south continues, and the Germans are being quickly shepherded toward Kilimanjaro, the capital, in the vicinity of which the round-up will take place a few weeks hence. The German native levies and carriers are demoralized and deserting, and the population in the areas traversed welcomes the British troops. Without the help of the natives the German defence will collapse like a house of cards.

Mr. Anderson, the county council have also decided this work in charge of the builder they can secure and at present considering se from outside who have had perience in road buildin should be no doubt in the the citizens as to the carry this work in the very bes There has been several made to the By-law as it sta is that there has been no made for the building streets such as Mill stree street and other streets. to this we would say that laid out under the By-law the roads that can possibl this season and it will not be to raise special money to b roads as it will be possible and the following year to t roads out of street appropri at the same time maintain good roads in a satisfactory other question is the buildi manent roads on our Ma This is a question that is re careful consideration of t and information is being g to the best kind of permane be built on Main or Dundas this matter will have to be for another year as the co that it is more important to at large to have the main r ing into town placed in a p dition before any work on M is undertaken. Main stre passable condition and with pair will answer for this ye this work is undertaken n will be done as a Local Im and a large portion of the ed up to the property owne ing the citizens to support and see that it is carried on the council feel that they in the best interests of the that every public spirited ci has the interests of the town should vote in favor of the l should also use their best i see that it is carried.

NEE EXPRESS

DA—FRIDAY, JUNE 9th, 1916

\$1 per Year in advance: \$1.50 if not so paid.

LAW TO BE VOTED TODAY, JUNE 19.

The council are asking the action a By-law authorizing by debenture of \$10,000 to build certain roads as deformer letter. The principle proposed to be built are the leading into town, that is High Road, the Selby road street and the Belleville street. It will not be necessary to say whether about the condition of the roads as the citizens are well known they are in a very bad and dangerous for traffic. The council has already thus far appropriated money for street building and maintain the in the town proper. It will be necessary to capital portion of the annual appropriation to build these roads as they are built the cost and keeping them in a very small charge on it will be quite possible to appropriate \$1000.00 for this and more. This amount will be off the debentures each next ten years. By this would be practically no rate of taxes and we the use of good roads is only a great convenience to town but also a town. The council have to believe that the government bear forty per cent of constructing these roads. Farm lands there being miles of this class of roads. Bring back to the town \$1000 which amount will be at the total amount proposed and in place of debentures for \$10,000.00 only require to borrow \$10,000. Several questions have been asked by the citizens as to what is proposed, how they are instructed and who will be of the actual laying out of these roads. In these questions we would council propose building government engineer will maintain Macadan roads. Be from fourteen to sixteen feet wide with about a ten inch deep and substantial foundation surface drainage will be in all cases and where the drainage will be on the sides of the streets. The road department to send their road engineer to the work and see that the roads are constructed and we will give advice and assistance of an, the county engineer. have also decided to place charge of the best road can secure and they are considering several men who have had wide ex-

EARL KITCHENER LOST

War Secretary and Staff Drowned in North Sea.

British Admiralty Reports the Sinking by a Mine or Torpedo of the Cruiser Hampshire on Which Kitchener and a Corps of Officers Were Traveling to Russia—Robertson in London.

LONDON, June 6.—Earl Kitchener, Minister of War, with his entire staff, was lost when the cruiser Hampshire was sunk north of Scotland. He was en route to Russia. The Admiralty statement follows: "Admiral Jellicoe reports: 'I have to report with deep regret that His Majesty's ship Hampshire, Capt. Herbert J. Savill, R.N., with Lord Kitchener and his staff on board, was sunk last night at about 8 p.m., to the west of the Orkneys, either by a mine or a torpedo. 'Four boats were seen by observers on shore to leave the ship. The

EARL KITCHENER.

wind was north-northwest, and heavy seas were running. "Patrol vessels and destroyers at once proceeded to the spot and a party was sent along the coast to search, but only some bodies and a capsized boat have been found up to the present. As the whole shore has been searched from the seaward I

Overland

Six \$1600

Model 86—f.o.b. Toronto

Real Comfort for Seven

Canvass the world and you will not find as big a car as the Overland Six at anywhere near so low a price, \$1600.

You who prefer seven passenger capacity, must pay a heavy excess in price to get so much real seven passenger comfort in any other car.

And to back up its big roomy seven passenger carrying capacity there is the powerful six cylinder Overland motor.

Take your full quota of seven big passengers and see how smoothly and easily, without a sign of effort, your powerful motor speeds away with even an overload.

Slow down to a crawl—don't touch the gear shift—keep it in high—but just touch your accelerator.

Without a tremor, smoothly, easily, swiftly, you acquire any desired speed.

That's genuine six cylinder pickup—a big outstanding Overland Six fact. And it's that big fact about this big car that makes its price, \$1600, so small in comparison.

Overland four cylinder models will "pick up" with many another six.

Our only purpose in building a six at all is to supply with genuine Overland finality and economy that extremist demand for the luxury of bigness and lightning fast pickup.

Overland production—double that of any other builder of cars of like class—makes possible the unapproached value which you get in so big and exceptional a car at so low a price—\$1600.

Have the Overland dealer overload the six and demonstrate its comfort and lightning fast pickup.

You cannot equal it for anywhere near the price.

TIRES Get our Special Close Price on Dominion and Dunlop Tires—30 x 3½, 32 x 3½, 33 x 4, 34 x 4.

WEDNESDAY.

The Synod of Niagara opened its
annual meeting at Hamilton.

The 163rd Battalion, from Mont-
real, has safely arrived in Bermuda.
The London Ad. Club was formed,
with more than fifty charter mem-
bers.

Hamilton City Council has decided
to advance the clock one hour on
June 4.

The British victory over Ali Dinar
in the Sudan was greater than at
first reported.

Colonel Mosby, the most famous
guerrilla leader in the American
Civil War, is dead.

First drafts of stations in London
and Bay of Quinte Methodist Confer-
ences are announced.

Herbert Holmes, a farmer of God-
erich township, thirty-five years of
age, was killed by a colt's kick.

The three and a half year old son
of Mr. and Mrs. Ed. Seibert, Water-
loo, was drowned in a creek yester-
day.

Pte. (Rev.) J. K. Fairfull, 161st
Battalion, was chosen Moderator of
the Walkerton Baptist Association at
Clinton.

Berlin citizens are much dissatis-
fied over the selection of six names
to vote on for the city, made by the
committee of ninety-nine.

The Serbian army has been trans-
ported from Corfu to Salonica by the
French navy, it was announced yester-
day by Admiral Lacaze.

An open jack-knife was thrown at
Colonel Roosevelt yesterday in Kan-
sas City while driving through the
streets in a Memorial Day parade.

Joseph G. Clifton, liveryman, of
Woodstock, was drowned when an
automobile he was driving plunged
over a parapet into Mud Branch
Creek.

Major-General Sir Sam Hughes,
Minister of Militia, and Honorary
Colonel J. Wesley Allison were on
the stand at the Meredith-Duff Com-
mission inquiry.

Prof. John MacNeill, President of
the Sinn Fein Volunteers, who last
week was found guilty of complicity
in the Irish revolt, has been sen-
tenced to life imprisonment, and the
sentence has been confirmed.

THURSDAY.

Lord Robert Cecil arrived in Paris
to confer on the blockade of Ger-
many.

Hotels near Camp Borden will re-
main open, but will be out of bounds
to soldiers.

Johnnie McAfee, of 85 Markham
street, Toronto, was found dead in
bed, as a result of escaping gas.

The Whitmonday Bank Holiday in
Britain has been postponed in order
not to interrupt the munitions out-
put.

Wm. Leck of Toronto, aged 65,
was trampled to death, probably
while in a fit, by a horse in a stable
at Virgil.

The street cars at Kazun have been
stopped by snow.

The home of Frank Rivers, at
Milliken's Corners, was struck by
lightning last night, and one end of
the house was torn out.

Two murderers, Roy Champlin and
John Supe, were put to death yester-
day morning in the electric chair at
the State prison at Sing Sing, N.Y.

Two women, Mrs. H. Larose, aged
45, and her daughter-in-law, aged 21,
died in Lorette, near Quebec, horri-
bly burned by the explosion of a
small petrol ironing stove.

Charles SooySmith, widely known
as a civil engineer, died in New
York yesterday at the age of 60
years. He introduced the so-called
freezing process for excavation.

A sudden flash of lightning during
one of the big electrical storms which
swept Ontario yesterday killed Pri-
vate William Creser of the 169th Bat-
talion, 439 Clinton street, Toronto, at
Niagara Falls.

The following Canadian birthday
honors were announced yesterday:
Privy Councillors Sir Max Aitken and
Sir Gilbert Parker; K.C.M.G.'s, Lt.-
Gov. P. E. LeBlanc of Quebec, Sen.
J. A. Loughheed; Knights Bachelor,
Wallace Graham (Chief Justice of
Nova Scotia), P. A. Landry (Chief
Justice New Brunswick), and R. T.
Stupart (Director of Meteorological
Bureau, Toronto).

MONDAY.

Flight Sub-Lieut. J. Russel Cham-
berlin, of Toronto, was killed in Eng-
land.

John Nelson McLean, an infant,
was smothered in Toronto by his mo-
ther rolling over on him.

Andrew McDonald, a pioneer
blacksmith of Petrolea, Ont., died
yesterday in his eightieth year.

Andrew McKee, a farmer of North
Oxford, 77 years old, died of heart
failure while at work in the field.

The heaviest traffic for one month
yet reported passed through the
canals at Sault Ste. Marie during
May.

A lad, Percy Wilson, son of Alonzo
Wilson, near Brighton, while driving
cows to pasture, was killed by a troop
train.

The daylight-saving scheme went
into effect at Hamilton last night, the
clock being moved forward an hour
at 9 o'clock.

Captain John Simpson, a veteran
Canadian navigator and shipbuilder,
died at his home in Owen Sound in
his 91st year.

Colors were presented to the 160th
Battalion at Chesley, and its funds
were augmented by \$1,500 gate re-
ceipts at the park.

James Codere of Chatham, believ-
ed to be a discharged soldier of the
70th Battalion, was drowned, it is
thought through suicide at Windsor.

Princess Patricia Chapter, I. O. D.
E., London, Ont., raised \$1,265 by
a tag day for a fund to provide educa-
tional facilities for blind soldiers re-
turning.

James Codere of Chatham, believ-
ed from papers found in his clothing
to be a discharged soldier from the
70th Battalion, is thought to have

ence received the minimum salary for
the past year for the first time in the
history of the conference.

Sir Cecil Spring-Rice, the British
Ambassador to the United States,
has been notified to the bestowal
upon him of the Order of the Grand
Cross of St. Michael and St. George.

President A. J. Johnston of the
Council of the Ontario College of
Pharmacy in his annual address said
that the Ontario temperance act was
satisfactory to the druggists of the
Province.

Ottawa City Council last night de-
cided to put the daylight-saving plan
into effect in the capital by advanc-
ing the clocks of the city one hour
from June 15th to October 1st next.

Pte. Jos. Meininger of the 118th
Battalion was sentenced to eighteen
months at the Prison Farm for an
aggravated assault on P. C. Blovis
when the latter was serving him
with a summons.

Seydlitz Didn't Get Away.

**COPENHAGEN, June 6, via Lon-
don.**—The Stifts-Tidende of Aalberg,
which yesterday published a report
that the 25,000-ton German battle
cruiser Seydlitz was sighted on
Thursday off Fano Island, pursued by
British warships and badly damaged,
says it is now believed the Seydlitz
was sunk. A despatch to this news-
paper from Ribe, Jutland, reports
that persons living in Schleswig have
received word that relatives on board
the Seydlitz were killed.

His Regular Cue.

"What made you start clapping your
hands when that woman stepped on
your foot in the car?"

"I was dozing," answered Mr. Cum-
rox. "I thought mother and the girls
were having a musical at home and
one of them was signalling that it was
time to applaud."

Dilemma.

SEA FIGHT WAS VICTORY.

Germans Lost More Than British in Naval Engagement.

LONDON, June 6.—The British Admiralty Sunday afternoon gave out a statement declaring that pending the compilation of details of last Wednesday's North Sea battle these facts have been positively established:

The German reports of the battle are false.

The German losses were heavier than the British, not merely in proportion, but positively.

The arrival on the scene of battle of the main body of the British high seas fleet was the signal for the German fleet to speed back to its base.

Previous to Sir John Jellicoe's arrival the German fleet had been severely punished. Sir John took up the pursuit. The two main bodies were repeatedly in momentary contact, but the Germans' flight made it impossible for the British to bring their full force into play.

Darkness put a stop to the pursuit, and then the destroyer flotilla took up the chase and successfully attacked the Kaiser's warships.

Late Sunday night a German Admiralty statement was received here, asserting that the German fleet suffered no losses beyond those admitted in Saturday's official account.

While the British Admiralty does not cite names to support its assertion that the German losses were heavier than the British, it declares that "there seems to be the strongest ground for supposing" that the following units were lost by the Germans:

Two battleships, two Dreadnought battlecruisers of the "most powerful type," two light cruisers of the latest type (Wiesbaden and Elbing), one light cruiser of the Rostok (1912) type, the light cruiser Frauenlob, at least nine destroyers, one submarine.

This would make a total of eight warships, nine destroyers and one submarine, a grand total of 18 vessels, as against only six warships and eight destroyers—a grand total of 14 vessels—admittedly lost by the British.

The British claim brings the German loss in tonnage—thus far asserted by Berlin to be only 49,000—well up to or even beyond the British loss of 125,000 tons.

RUSSIAN DRIVE BEGINS.

Thirteen Thousand Teuton Prisoners Taken on First Day.

LONDON, June 6.—On a front of 85 miles from the Rokitno Swamp, not far south of Pinsk, down to the westernmost strip of Besarabia, the Russians during the last 24 hours have begun the long-expected concentrated infantry attack against the Austro-Hungarian lines.

The net result of the first day of the new drive, according to the Petrograd War Office, consists in 13,000 prisoners taken in "important successes achieved in many sectors." The great attack is still in its preliminary stage, the Russian official report indicates, saying that "the fighting is developing."

All along the south-western front in Russia, where the Teuton lines are defended chiefly by Austrians, the Czar's heavy artillery has opened a violent fire and indications are that

is blended from selected hill-grown teas, famed for their fine flavoury qualities. Imitated yet never equalled.

ONSLAUGHT FAILS.

Germans Try Unsuccessfully to Turn French Positions at Fort Vaux.

PARIS, June 6.—Several attempts made by the Germans Saturday night and Sunday morning to turn the French positions at Fort Vaux, on the Verdun front, from the south-east, were unsuccessful, the War Office announced Sunday afternoon. The night attacks resulted in their gaining a foothold in the French trenches in the ravine between Damloup and Fort Vaux, but they were immediately driven out by a counter-attack. The assault Sunday morning was checked by the French curtain of fire.

The Germans reported the shelling of the fortified village of Damloup, on the eastern slope of the Vaux heights, with the capture of ten officers, 520 men, and several machine guns. The Berlin statement asserted also that French efforts to penetrate trenches south-west of Vaux failed with severe losses to the attacking forces.

The French communique admitted the occupation by the Germans of a deep ditch north of Fort Vaux.

Two Zeppelins Destroyed.

ESBJERG, Denmark, June 6.—Two Zeppelin dirigible balloons are reported by fishermen returning to port to have been destroyed.

The Avis Lamvig states that fishermen saw a Zeppelin in flames as the result of gunfire and that the air vessel was destroyed at a point 40 miles off the Thyborloen Canal. The entire crew perished. The Ekstrablads says that fishermen arriving at Ringkjobing say they saw another Zeppelin destroyed Friday some miles from these waters.

Mayor Charges Assault.

INGERSOLL, Ont., June 6.—Charged with assaulting Mayor W. J. Elliott, occasioning actual bodily harm, a warrant has been issued for the arrest of ex-Chief of Police A. W. Gummerson. The alleged assault took place on Monday, May 22nd, and on the 27th of May an information was laid and a summons issued. The efforts to serve the summons having been unsuccessful, a warrant has been issued and outside police departments notified.

Lightning Killed Stock.

FOREST, Ont., June 6.—Four head of cattle and a valuable horse killed were the toll taken by a heavy electrical storm which passed over

HANGING PICTURES.

This Is a Task That Should Produce Artistic Results.

In going over one's pictures eliminate all but the choicest and best beloved and try to group together the pictures whose subjects are somewhat related or which have a similarity in frames. Indeed, even when subjects are closely related it is not possible always to hang pictures together owing to a too great difference in the kind of frames. As a rule, any room looks better, especially small rooms, where only one color frame is used on all pictures, but if this is not possible then the next best thing is to keep all of the pictures in gilt frames in one part of the room, all of the dark framed pictures on another wall, etc.

Also one can get the best results by separating water colors and prints, and etchings or engravings should, of course, always be hung apart from other pictures. Another point frequently overlooked is the wisdom of putting the darker pictures on the wall that receives the best light from windows and contrariwise the gilt framed pictures of lighter subjects where they may serve to brighten a dark part of the room.

Finally do not crowd the walls. Hang pictures well in line with the eyes of a person of average height and, of course, choose plain walls, tinted or papered, for backgrounds.

How Tea Is Named.

In India and Ceylon teas are named according to the different leaves of the plant. The two small leaves at the tip of the shoot produce, as a rule, the best tea, known as "flowery" and "orange" pekoe. Pekoe without an adjective (literally "white down") is made from the leaf immediately below those of the orange and flowery. Next in the descending scale is the leaf of the somewhat coarser souchong ("little sprouts"), and lower still are larger leaves yielding congou (laborer's tea, or tea on which much labor is required to make it fit for the market) and Bohea. Blended tea is now often described as "congou." Originally the name Bohea was applied to any kind of black tea, it being assumed that it all came from Wui (pronounced by the Chinese Bui).—London Chronicle.

When Pens Were First Used.

About the year 600 A. D. pens made of quills were introduced. This is shown by the fact that the word pen-

of the battle: of a very severe nature increasingly south-east of en Hooge and the Ypres-ay. Following on their ntage obtained Saturday penetrating our forward neighborhood, the Ger- d their attack during the succeeded in pushing defences to a depth of n the direction of Zille-

defended chiefly by Austrians, the Czar's heavy artillery has opened a violent fire and indications are that the Russians are planning a new offensive on a large scale against the Austrians, evidently with the view to making impossible the withdrawal of reinforcements for the Austrian offensive on the Trentino, and possibly for the purpose of forcing the despatch of Austrian troops from that front to the Russian battle line.

Such an offensive by the Russians at this time would also have an effect upon the Verdun fighting, where Austrian reinforcements were reported to have arrived last week. The Russian artillery fire during the last 24 hours has been particularly violent on a front of 25 kilometres (about 17 miles) near Olyka. This town lies slightly to the south-east of the Volhynian fortress of Lutsk, in Teuton hands since last fall, and due north of the fortress of Dubno, also captured in the great Teuton drive ten months ago.

The Russian attack in this region is facilitated by the base at Rovno, the third Volhynian fortress, which the Austro-German forces have vainly tried for months to approach. On the Dniester and the lower Strypa, as well as north-west of Tarnopol, on the Galician front, which is defended exclusively by Austro-Hungarian troops, the Russian big guns are equally active.

AEROPLANES BROUGHT DOWN.

German Craft Are Wrecked in Air Raid on Toul.

PARIS, June 6.—The German aeroplanes which bombarded Toul on Sunday were brought down by a French pursuing squadron. The French official report says:

"Sunday at noon a group of German aeroplanes dropped several bombs on Toul. Six persons were killed and about ten were wounded. The material damage was of slight importance. No military establishment was struck.

"A pursuit squadron from Toul took the air immediately and vigorously pursued the enemy aeroplanes, one of which was brought down in our lines at Sanzey, twelve kilometres north of Toul. Two other enemy aeroplanes, struck by the mitrailleuse fire of our machines, descended abruptly in the German lines."

King Constantine May Abdicate.

ROME, June 6.—An uncensored despatch from Athens hints at the possibility of the abdication of King Constantine of Greece. The despatch adds that the resignation of the Greek Cabinet is inevitable, and that it will result in sensational developments.

State of Ohio, City of Toledo.

Lucas County, ss.
Frank J. Cheney makes oath that he is senior partner of the firm of F. F. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

Sworn to before me and subscribed in my presence, this 6th day of December, A.D. 1886.
A. W. GLEASON.

(Seal) Notary Public.
Hall's Catarrh Cure is taken internally and acts through the Blood on the Mucous Surfaces of the System. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O.
Sold by all druggists, 75c.
Hall's Family Pills for constipation.

head of cattle and a valuable horse killed were the toll taken by a heavy electrical storm which passed over this section Saturday. The cattle belonged to Henry Hodgson, of Lake Road, Bosanquet, while the horse was the property of Henry Frayne, 11th concession.

Why Languages Differ.

An interesting contribution to the discussion of a universal language is offered by the Montreal Family Herald.

The adoption of a universal language, purely spoken by all who use it, is made difficult by the fact that there are physical differences of an important character between the different races. The vocal organs are so unlike in different peoples that a language originally uniform would soon change in the mouths of the various nations until they could no longer understand one another. If the Italian language could be taught to all Chinese or Russians it would change so rapidly that in a few years no one would recognize it as Italian. One theory to account for this fact is that the people in the chilly north speak with the lips nearly closed and that those who live in milder climates give free articulation by opening the mouth.

Unkind.

"Does your wife wear spats?"
"Wear 'em? She starts 'em."—Detroit Free Press.

Outguessed.

"What size collar do you wear?"
"About a half size too small for you."—Pennsylvania Punch Bowl.

A Definition.

Little Elmer—Papa, what is hope?
Professor Broadhead—Hope, my son, is what we have left.—Exchange.

Lucky.

"I hear that Jones is up to his ears in debt." "Yes, but luckily he isn't very tall."—Boston Transcript.

First and Second Thoughts.

In matters of conscience first thoughts are best; in matters of prudence last thoughts are best.

An English Coal Mine.

Birmingham, England, has a mine in which one coal seam is twenty-eight feet thick.

His Machine.

Knicker—Has Jones a runabout?
Bocker—No, just a talkabout.—New York Sun.

Record Gold Nugget.

When taken out of the mine the largest gold nugget in the world weighed 640 pounds.

Philippine Forests.

The virgin forests of the Philippine Islands cover an area about equal to that of the state of Kentucky.

Gold Leaf.

A floor fourteen feet square might be covered with a single ounce of gold leaf.

Japanese Dogs.

Japanese dogs are almost destitute of noses, having the nostrils set directly in the head.

Polo.

Polo is an oriental game of antiquity which, it is claimed, can be traced back to 600 B. C.

About the year 600 A. D. pens made of quills were introduced. This is shown by the fact that the word pen-na, a quill, is not found, it is claimed, in any work bearing an earlier date. Previous to that time the word calamus, signifying a reed, was exclusively employed as a designation for the vehicle used in transferring the ink to the parchment or other surface selected by the writers of that early age. Steel pens first came into use in 1803, and about twenty-two years later those composed of gold made their appearance.

How He Took It.

"In training," said an instructor in athletics, "the strictest obedience is required. Whenever I think of the theory of training I think of Dash, who, after eighteen years of married life, is one of the best and happiest husbands in the world.

"Dash," I once said to him, 'well, Dash, old man, how do you take married life?'

"According to directions," he replied."

Melba's Name.

Mme. Melba's name was Nellie Mitchell until her marriage, when it became Mrs. C. N. F. Armstrong. At the time of her debut into opera she decided to adopt a stage name, and her intense loyalty to the land of her birth moved her to combine the first four letters of Melbourne, her native town, and the last letter of Victoria, the reigning queen of that time, together making Melba.

Mustard Sauce.

Materials.—Two tablespoonfuls butter, one tablespoonful flour, one cupful warm water, two tablespoonfuls dry mustard, salt, red pepper.

Utensils.—Saucepan, cup, spoon and knife.

Directions.—Melt the butter, add the flour; when thick add water and stir smooth; add mustard, salt and pepper to taste.

This is a good sauce for a white fish like haddock or cod.

The Swish of the Rod.

A college president in an address on pedagogy said:

"And one of the most remarkable changes in the last thirty years of teaching is the abolition of corporal punishment. A boy of this generation is never whipped. But boys of the last generation must have believed that their instructors all had for motto: 'The swish is father to the taught.'"

Caution.

He—Now that we are in this great field alone with each other and nature, let me tell you a sweet secret. She—Let's go out of this field into the potato patch. You must remember that, though potatoes have eyes, corn has ears.

Appropriate.

"So your manicurist has sued your dentist for breach of promise?"

"Yes, and the case is to be fought tooth and nail."

Boatman, ask not what to do; pull the oar that's nearest you.

SHOEBLACKS IN GREECE.

They Shine as Artists in One of the National Recreations.

Boot cleaning, one of the milder recreations that Saloniki offers, ranks among the national industries of Greece. To sit drinking little cups of Turkish coffee and having his boots cleaned at the same time is the Greek's ideal of a pleasant afternoon. The lustrous, as Greek shoeblacks are musically called, though usually of tender age, is a true artist and is by no means content with the dull burnish that satisfies the English boot boy.

He first meticulously scrapes your boot clean of the smallest fragment of mud, then wipes it carefully so as to have a perfectly clean background to work on. After that he applies the blacking, not by dabbing the blacking brush into the tin, but with a variety of little metal implements and sponges.

When he has brushed this to a bright polish you imagine that your shine is over, but it has really only begun, for the lustrous now goes on to bring out the high lights by smearing your boot over with a colorless cream which he brushes again to great brilliancy and finishes off by two or three minutes' friction with a velvet cloth. He completes his work by painting the edge of sole and heel with a sort of varnish.—G. Ward Price in London Times.

A Slight Misadventure.

When Roosevelt was in the White House he received from an inmate of a penitentiary an appeal for a pardon couched in something like the following terms:

"Dear Colonel—Maybe you'll remember I was with you in the rough riders. They've got me locked up in this hole, and I want you, please, to get me out.

"It was all a mistake, anyhow. The judge sent me up for ten years for shooting a lady in the eye. I didn't mean to do it—honest, I didn't. I wasn't even shooting at the lady. I was shooting at my wife."

Cutting Diamonds.

The method of cutting diamonds is a very delicate one, diamond dust being largely used for the cutting, as no steel is hard enough for the purpose. It is remarkable that the diamond cutters can cut such small stones into perfect brilliants, but sometimes there are cut 100 to a carat, a carat weight being only 3.2 grains, and when shown in a bit of white paper look like a number of brilliant minute stars.

The wonder is not that diamonds are so costly, but that they can be purchased for any price within reason, when the rarity of good stones and the difficulty of cutting is all considered.

Beauty of the Silver Acacia.

There are many miracles. A silver tree is always one of them. When it rains your heart is likely to be broken because the silver acacia has its bright eyes so filled with shining tears that it may spill them any minute from the weight, and its death means the end of joy. This is the one acacia that seems

A WEATHER MYTH

The Idea That the Old Fashioned Winter Was a Fury.

FAMOUS FROSTS WERE RARE.

Records Show That Remarkable Snowstorms and Long Seasons of Hard Freezing Were Not All the Rule. Testimony of Pepsys and Evelyn.

Perhaps the greatest of weather myths is the legend of the "old fashioned winter"—that prolonged season of ice and snow which is supposed to have held the land in its grip every year. So firmly has this idea been held for many years that it came as a shock when meteorologists first began to delve into the records of the past and prove its inaccuracy.

There can be no doubt that Charles Dickens, Washington Irving, artists who depicted winter scenes, and, in a later era, the Christmas number and the Christmas card are mainly responsible for the belief that up to about half a century ago the British winters were always extremely severe.

Such records as we possess prove the fallacy of the idea. No records of the weather were kept up to about fifty or sixty years ago, so that we have to rely on the statements of private diaries and old family records, and therefore it takes a lot of research to obtain any data at all.

In olden times no one troubled to make note of average weather, for writing was an art possessed only by few, and writing materials were hard to obtain; hence it is that mention is made only of something unusual, some abnormally mild winter or heavy fall of snow or prolonged frosts.

And when all is said there are comparatively few of the latter, although they were likely to be recorded, while the milder ones would be passed over. A few years ago there were published in France some notes concerning very mild winters in early times. Gregory of Tours tells us that 584 was exceptionally mild, as were the winters of 808, 834, 844 and 1007, when influenza was rife.

Another mild season occurred in 1229, when the birds are said to have hatched their young by February, while the weather journal of the Rev. William Merle, which is in the Bodleian library at Oxford, shows us that during the middle of the fourteenth century the weather was very much as it is now and that mild winters were not uncommon.

There were one or two mild winters during the next hundred years, the most notable one being that of 1495, when barley and corn were in the ear at the end of January. Writings of the sixteenth century have similar testimony to offer, the one or two exceptions only going to prove the rule because they aroused so much comment.

Pepsys and Evelyn come to our aid from the middle to the end of the seventeenth century and prove conclusively that the old fashioned winter is a

HISTORIC BRENNER PASS.

This Alpine Gap is a Famous Pathway For Great Armies.

The mighty Brenner pass is the Thermopylae of Tyrol. From times immemorial the northern tribes have sought the refinements and culture of the south over this wonderful Alpine saddle, first in fame among all the gaps in the rugged Alpine defenses against the north, and a way which has echoed to the dying cries of warriors and clashing accouterments of myriad Roman legions and to the noisy disorder of the passage of many armies through more than 2,000 years of restless history.

Innsbruck, the Tyrolean capital, is at the northern terminus of this way, while Botzen, the largely Latinized metropolis of the south, lies 3,000 feet below. Innsbruck is exclusively of the northland, surrounded by plums, apples and fir trees, and Botzen, like Italy beyond the mountains, is in the midst of a region of vines, figs and olives.

Historic points crowd one another along the Brenner. Guidestones of the time of Caracalla and Septimius Severus have been found buried here. Some of the world's greatest generals have traveled this path, north and south, and here the Tyrolean peasant, Andreas Hofer, the simple, untaught Austrian hero, proved himself greater than one of the best officers of Napoleon.—National Geographic Bulletin.

Conditions Reversed.

One of the finest examples of "pawky" humor is placed to the credit of an old gardener who was in the service of Admiral of the Fleet Sir Alexander Milne. The admiral was a grand old man, full of goodness and kindness, but a strict disciplinarian. The gardener having omitted to do something which he had been told to do, his master said to him:

"When I was on board ship I would have had you put in irons for disobedience."

The old gardener was not much perturbed at the idea, but, leaning on his spade, replied:

"Aye, maybe, Sir Alexander, but when ye were on board ship ye had a hunder men tae dae ae job, an' noo ye hae ae man tae dae a hunder jobs."—London Tit-Bits.

Emotionally Senile.

I know no more dismal spectacle than a man talking shop on a moonlit hill in August, a woman gossiping by the rail of a steamer plunging through the sapphire of the gulf stream or a couple perusing advertisements throughout a Beethoven symphony. I will not advance as typical a drummer I once saw read a cheap magazine from cover to cover in the finest stretch of the Canadian Rockies. He was not a man, but a sample fed, word emitting machine. These people, emotionally speaking, are senile. They should not try to read poetry.—Henry Seidel Canby in Harper's Magazine.

A Trick With an Egg.

Place two V shaped wineglasses of the same size near the edge of a table. In the right hand one put an egg, just fitting the rim of the glass. Hold the bases of the glasses firmly down, the

eyes so filled with shining tears that it may spill them any minute from the weight, and its death means the end of joy. This is the one acacia that seems almost at its loveliest when not in bloom. It is like a hand illumined edition of fairy stories bound in bright gray silk, with tassels for book marks. Every trembling leaf makes you think of the kiss of a child. When you pass the tree you feel baby arms about your neck. You may exist without a silver acacia, but you cannot be said to live without one.

Orders of British Knighthood.

The titles of the different orders of knighthood are all of a most high and mighty description. The Garter is "most noble," the Thistle "most ancient and most noble" and St. Patrick "most illustrious." The Knights of the Bath are officially "most honorable," the Star of India is "the most exalted," St. Michael and St. George is "the most distinguished," the Order of the Indian Empire is "the most eminent"—London Globe.

Charity.

She—I'm glad we went. It was an excellent performance—and for such a charitable purpose! Her Husband—Yes, indeed! We all feel a thrill of satisfaction when we do something for charity and get the worth of our money at the same time.

Sight Unseen.

Head of Firm—How long do you want to be away on your wedding trip?

Hawkins (timidly)—Well, sir—er—what would you say?

"How do I know? I haven't seen the bride."

The Septuagint.

Septuagint means seventy. The septuagint version of the Old Testament originated, according to Aristeas, as follows: Ptolemy Philadelphus (284-247 B. C.) when engaged in making a collection of the laws of all nations for the great Alexandrine library was advised by his librarian to have the Jewish Scripture translated into Greek, and the king had the work done by seventy (or seventy-two) learned Jews from Jerusalem. The letter of Aristeas is probably mythical, but the substance of the story it tells is probably quite true.

The Term "Bully."

The term bully in the days of Shakespeare had quite a different meaning from that which it has at present, being an expression of endearment and good fellowship. Some suppose that the word, when it is used in approval, is derived from the Dutch *boel* or German *buhle*, which stands for the English lover. The harsher use of the word is, however, to be traced to below, the root of bull, with a significance of noisy blustering.

Paying for the Bait.

Husband—Here's an enormous bill for a ball dress. What does it mean? Wife—Ah, you remember that green robe I wore at the ball at which I was introduced to you last year. Husband—So! Do you mean to say, then, that I am to pay for the trap in which I was caught?—London Telegraph.

Pepys and Evelyn come to our aid from the middle to the end of the seventeenth century and prove conclusively that the old fashioned winter is a myth. The dairies of these famous writers have been analyzed, and as a result it is found that falls of snow are mentioned only thirteen times over nearly sixty years, while exceptionally heavy storms are referred to only three times.

In the same period there were but six prolonged frosts, and apparently only the famous one of 1683-4 and another a few years later were so severe as the modern ones of 1890-1 and 1895. In January, 1661, Pepys comments on the mild winter, and in December of the following year he notes that he awoke to find the roofs covered with snow, which he had not seen for three years.

Evelyn has the same story to tell—a few hard winters and many mild ones. Such years were 1686-7, Dec. 29. "Little appearance of winter as yet," and 1692-3, Feb. 4. "Hitherto an exceedingly mild winter—an extraordinarily dry and warm season, without frost and like a new spring, such as has not been known for many years."

Here and there we come across references to the weather which are just like the letters written to modern newspapers informing readers that "roses and primroses were in bloom in my garden on Christmas day." Gilbert White's record of the weather between 1768 and 1798 helps to end the myth, for the same number of years at the present day would show pretty much the same sort of weather, as thirteen of the Decembers were mild and wet.

There were mild winters in the beginning of the nineteenth century, as well as one or two severe ones, so that we may rest assured that the "old fashioned winter" was just like the new fashioned ones.—Ernest C. Pulbrook in London Family Herald.

Stuck to His Rule.

He had just been discharged from the service, owing to wounds, and thought to raise a few pounds by writing his reminiscences of twelve months' fighting. Having completed the manuscript while in hospital, he offered it to a publisher for £100. It was a very small volume, and such a price made the publisher raise his eyes in surprise and inquire the reasons for such a demand. "My dear sir," replied the author, "it has been a point of honor with me, as a soldier, always to sell my life as dearly as possible."—London Chronicle.

It is his whole life, not a few incidents of it, that proves the man.—Bovee.

His Own Boss.

After a man has succeeded in gratifying a long felt desire to be his own boss he is likely to find that he has taken on a burden of responsibility which mars the joy over his success.

Considerate.

"The most considerate wife I ever heard of," said the philosopher, "was a woman who used to date all her letters a week or so ahead to allow her husband time to post them."

the same size near the edge of a table. In the right hand one put an egg, just fitting the rim of the glass. Hold the bases of the glasses firmly down, the top rims touching each other. Now with a quick, sharp breath blow upon the line where the egg and the glass meet. The egg will jump to the other glass. With a little practice this can be done every time. Be careful to blow in a line with the left hand glass, or the egg will jump in the wrong direction and land on the table.

Submarine Wonders of Hawaii.

Nowhere in this wide world are there such rainbow fish as in Hawaii, of every color and shade and hue. If there is any tint or grandeur of tints in the prism that is not reflected in the scales of the finny tribes in the waters around the islands I should like to see it. A visit to the Honolulu aquarium (far superior as it is to the world famous one in Naples), or to the Coral gardens, where we see the fish through a glass bottomed boat, disporting themselves in their own front yards, so to speak, is well worth while.

Go Light on Buckshot.

Buckshot should be relegated to the past along with the buffalo gun and the market hunter's "cannon." It will inflict a painful wound upon deer and yet will not kill except at very close quarters. Even the poorest shot can usually score a hit with buckshot, and he will in nine cases out of ten be tempted into "letting her have it" when the game is absolutely out of effective range. About the only useful purpose for which buckshot can be recommended is in self defense against a human enemy at close range.—Outing.

The Total Sum.

The three children came and stood in a row in front of their mother.

"Mamma," they said, "what would you like for your birthday?"

The mother looked down benignly upon the group and answered:

"My dears, mamma wants nothing for her birthday, nothing but three good children. She'd like that."

"But then, mamma," cried the eldest, "then we'd be six."

Had an Answer.

"She looked killing."

"How can a woman look killing?" demanded the purist.

"I suppose it is when she looks daggers," answered the resourceful party of the first part.

They Mostly Do.

She (recalling college days)—What became of our man of might? He—Oh, he married the woman of mustn't—Judge.

Where Speed Doesn't Count.

"Mamma," complained a little one recently, "teacher won't let me sing any more, and I'm the fastest singer in school too."

Quarantined.

Mother (to district health visitor)—I declare to goodness, miss, there ain't no danger of infection. Them children wot's got the measles is at the head of the bed, and them wot ain't is at the foot.

CATTLE MARKET

UNION STOCK YARD

TORONTO, May 5.—Live stock at the Union Y 3,195 cattle, 725 hogs, 321 lambs, and 155 calves.

The market might fairly be as follows:

Butchers—Of the best butch two loads sold at \$9.85 and the in general was from \$9.40 to butchers brought from \$8.75 to medium butchers from \$7.75 to Cows—Choice cows were at a cwt., selling at from \$7.50 medium from \$6.75 to \$7.50 Bulls—Choice bulls were sold from \$7.75 to \$8.75.

Feeders—Good feeders were mand, steers weighing from lbs. bringing from \$7.75 to \$8.

Stockers—Choice breeding weighing from 700 to 800 from \$7.25 to \$8, and stock 1 to \$7.25.

Milch cows—Choice milch all the way from \$7.50 to \$9.00. no outside orders for milch demand was very light.

Hogs—Hogs sold from \$10.00 weighed off cars and \$10.25 to and watered.

Sheep, lambs and calves v at unchanged prices.

MONTREAL LIVE STOCK

MONTREAL, June 5.—At real stock yards, West End, day the feature of the trade weaker feeling for cattle and cined 25 to 50c per cwt., as with last week. At the redu was a fairly good demand fr and butchers, choice steers \$9.25; small lots selling as hi per cwt.

In sympathy with the hi ruling at other Canadian cent hogs a stronger feeling prev today for selected stock showed an advance of 25c. Rough stock was weaker, 2 pounds lower. Selected lots \$11.50 to \$11.75, while rough at \$11 to \$11.25. Hogs sold \$9.75, and stags at \$5.50 to \$5. weighed off cars. The tone ket for calves continues fir good demand for both local c and for shipment to the U stock sold at 8 1/2 to 9 1/2c, good 8c, medium at 5c to 6 1/4c at 2 1/2c to 4c per lb. live weight.

The demand for sheep v firm prices, but the tone of for spring lambs was easier, lambs ruled lower, at \$4.50 t head.

EAST BUFFALO LIVE

EAST BUFFALO, N.Y., Ju de—Receipts, 4000; fairly ac ping, \$8.50 to \$10.80; butcher \$9.95; helters, \$7.50 to \$9; cov \$8; bulls, \$5.50 to \$8.25; st feeders, \$6.75 to \$8; stock he to \$7.25; fresh cows and sprir \$45 to \$100.

Veals—Receipts, 1500; activ \$11.75.

Hogs—Receipts, 15,400; act and mixed, \$9.70 to \$9.75; yor \$9.70; pigs, \$8.75 to \$9; rough \$8.60; stags, \$8.50 to \$7.25.

Sheep and lambs—Receipts five; lambs, \$5.50 to \$10; yearl \$9; wethers, \$7.75 to \$8; ewes, sheep, mixed, \$7.25 to \$7. lambs, \$7 to \$12.

By-Law No.

A By-Law to provide for borrowing \$10,000.00 upon Debentures to pay for the cost of constructing substantial macadam pavements on the streets named in the schedule attached hereto.

Passed the day of 1916.

WHEREAS it is necessary and desirable in the public interest to construct substantial macadam pavements upon the highways in the Town of Napanee as set forth in the schedule attached hereto, and

WHEREAS in order thereto it is necessary to borrow the sum of \$10,000.00 on the credit of the Corporation and to issue debentures therefore, bearing interest at the rate of 5 1/2 per cent. per annum which is the amount of the debt to be created by this by-law, and

WHEREAS it is expedient to make the principal of said debt repayable in yearly sums during the period of ten years of such amounts respectively that the aggregate amount payable for principal and interest in any year shall be equal as nearly as may be to the amount so payable for principal and interest in any of the other years, and

WHEREAS it will be necessary to raise annually the sum of \$1326.67 during the period of ten years to pay the said sums of principal and interest as they become due, and

WHEREAS the whole rateable property of the Town of Napanee according to the last revised assessment roll is the sum of \$1,399,057 and the existing debenture debt, exclusive of local improvement debts secured by special acts, rates or assessment is the sum of \$70,036.68, of which there is no part of the principal or interest in arrears.

BE IT THEREFORE ENACTED by the Council of the Corporation of the Town of Napanee as follows:—

1. It shall be lawful for the Mayor of the said Municipality and he is authorized and instructed to sign and issue said debentures hereby authorized to be issued and to cause the same to be signed by the Treasurer of the said Municipality and the Clerk of the said Municipality is hereby authorized and instructed to attach the seal of the said Municipality to the said debentures.

2. That for the purpose of raising the sum of \$10,000.00, ten debentures of the said Town of Napanee in the sum of \$1326.67 each shall be issued on the 1st day of August, 1916, each of which debentures shall be dated on the date of the issue thereof and shall be payable one on the 1st day of August in each of the years from 1917 to 1926 both inclusive at the office of the Treasurer of the Town of Napanee without interest. The interest calculated at the rate of 5 1/2 per cent. per annum on said loan having been included in the amount of the said debentures.

3. That during the currency of said debentures there shall be raised annually by special rate on all the rateable property of the Town of Napanee the sum of \$1326.67 for the purpose of paying the amount due in each of the said years for principal and interest in respect of the said debt.

4. The said debentures shall be sold

the town of Napanee, have by a three-fourths vote of all the members thereof determined that it is in the public interest to fix the assessment of the land and premises and property of the Napanee Curling-Bowling Limited used solely for the purpose of a curling rink and bowling green and for a place of sport, recreation and amusement, and

Whereas the said Napanee Curling-Bowling Limited were incorporated by Letters Patent under the Ontario Companies Act on the 18th of May, 1916.

Therefore the Municipal Council of the town of Napanee by a majority of three-fourths of all the members of the said council enacts as follows:

1. That from and after the first day of January, 1916, and continuously for the term of ten years thereafter the following lands, namely: All and singular that certain parcel or tract of land situate, lying and being in the town of Napanee in the County of Lennox and Addington more fully described as follows: Commencing on Thomas street at the south east corner of lot number one and at a distance of one hundred and thirty-two feet from East street and thence easterly along Thomas street eighty-five feet more or less to the County property, thence northerly parallel to East street and following the westerly boundary of the said County property three hundred and thirty feet, thence westerly parallel to Thomas street to the north east corner of lot number five on the east side of Thomas street, thence southerly parallel to East street three hundred and thirty feet to the place of beginning and the buildings to be erected thereon and which may hereafter become liable to taxation shall be assessed, at the sum of \$500.00 per year for all municipal purposes excepting for school taxes and for local improvements.

2. It is expressly understood that if any part of the lands above described is used for any purpose excepting for the purpose for which the company has been incorporated it is to be assessed the same as though this by-law had not been passed.

This by-law shall come into force and take effect after it has been submitted to the electors entitled to vote thereon and has received the assent of the electors so voting and after the final passing thereof.

Mayor

Clerk.

The foregoing is a true copy of a proposed by-law and if the assent of the electors is obtained to it it will be taken into consideration by the Council after the expiration of one month from the date of the first publication which said date of the first publication is the 26th day of May, 1916, and any tenant who is entitled to vote and who desires to vote must deliver to the Clerk not later than ten days before the day appointed for taking the vote the declaration provided for by sub-section 3 of section 265 of the Municipal Act, and

TAKE NOTICE that the vote upon said by-law shall be taken on the 19th day of June, 1916, at the following places, namely:

East Ward—Normile's shop.

Centre Ward No. 1—Town Hall.

Centre Ward No. 2—Mrs. Cronk's residence.

West Ward No. 1—Frank Kinkley's residence.

W. A. GRANGE,

HELP FOR WORKING WOMEN

Some Have to Keep on Until They Almost Drop. How Mrs. Conley Got Help.

Here is a letter from a woman who had to work, but was too weak and suffered too much to continue. How she regained health:—

Frankfort, Ky.—“I suffered so much with female weakness that I could not

do my own work, had to hire it done. I heard so much about Lydia E. Pinkham's Vegetable Compound that I tried it. I took three bottles and I found it to be all you claim. Now I feel as well as ever I did and am able to do all my own work again. I

recommend it to any woman suffering from female weakness. You may publish my letter if you wish.”—Mrs. JAMES CONLEY, 516 St. Clair St., Frankfort, Ky.

No woman suffering from any form of female troubles should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for forty years proved to be a most valuable tonic and invigorator of the female organism.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice,—it will be confidential.

PRUDENCE IN EATING.

Healthful Diet For a Person of Indoor Occupation.

In the American Magazine Dr. E. F. Bowers gives a diet suited to the average wealthy person of indoor occupation.

“An ordinary domestic egg equals about eight grams of protein. This is approximately the amount contained in a cubic inch of steak or in a half pint glass of milk. A generous slice of bread contains about four grams of protein. The quantity of potatoes ordinarily dispensed at a meal equals two and a half grams.

“Allowing for our inability completely to extract all the protein from any given amount of food and convert it into assimilable pabulum, a liberal modicum of albumen would be twice Hindhede's protein formula, or fifty grams—this, remember, for an entire day.

“Therefore a regular egg, five ounces of beefsteak and a glass of milk should supply for twenty-four hours all the protein the system requires. The balance of the diet should consist of starches, sugars, fats and plenty of cellulose or hay. This can best be found in vegetables, such as tomatoes, carrots, celery, turnips, beets, lettuce, squash and all that grand group of horse foods containing much fiber and little nutriment.

TLE MARKETS

NION STOCK YARDS.

NTO, May 5.—Receipts of

ION STOCK YARDS.

NTO, May 5.—Receipts of k at the Union Yards were 725 hogs, 321 sheep and 155 calves.

Market might fairly be classified as—Of the best butchers one or sold at \$8.55 and the best run was from \$9.40 to \$9.60. Good brought from \$8.75 to \$9.40, and butchers from \$7.75 to \$8.50. Choice cows were off fully 25c selling at from \$7.50 to \$8, and rom \$6.75 to \$7.50 per cwt. Choice bulls were slow of sale at \$ to \$8.75.

—Good feeders in fair dealers weighing from 800 to 900 ing from \$7.75 to \$8.75.

—Choice breeding stockers from 700 to 800 were worth \$ to \$8, and stock heifers \$5.75

ows—Choice milch cows sold y from \$7.50 to \$9.00. There were a orders for milch cows and as very light.

—Cows sold from \$10.65 to \$10.75. Cars and \$10.25 to \$10.35 fed red lambs and calves were steady ed prices.

TREASURY STOCK.

EAL, June 5.—At the Mont- yards, West End Market, to- eature of the trading was the eling for cattle and prices de- to 50c per cwt., as compared week. At the reduction there rly good demand from packers ers, choice steers selling at all lots selling as high as \$9.50

pathy with the higher prices ough Canadian centres for live ronger feeling prevailed locally selected stock and prices n advance of 25c per cwt. ck was weaker, 25c to 100 ver. Selected lots sold at \$11.75, while rough lots sold \$11.25. Sows sold at \$9 to stags at \$5.50 to \$5.85 per cwt., ff cars. The tone of the mar- alves continues firm under a ind for both local consumption hipment to the U.S. Choice at 8½ to 9½c, good at 7½c to m at 5c to 6½c and culls at per lb. live weight.

A New Disease.

An excuse to a Chicago schoolteacher read:

"She was sick she had a head egg and a tooth egg and a ear egg. She could not go to school, she was laying all the time in bed."

Not After the Best.

"She says she wouldn't marry the best man on earth. Plenty of girls say that. Idle talk, eh?"

"Oh, I don't know. Some girls actually mean it. Some of them are looking for wealth."

squash and all that grand group of horse foods containing much fiber and little nutriment.

"Try this regimen for awhile and see if fermentation, headache, insomnia, rheumatism, nervousness and "that tired feeling" do not disappear like snow upon the desert's dusty face. And, when they do, remember that the chances of later developing Bright's disease, hardening of the arteries and heart failure have been reduced to the irreducible minimum.

"The eating game is the most important in life."

CHIMNEYS ON LAMPS.

Why They Prevent the Lighted Wicks From Smoking.

When a lamp is burning without a chimney it generally smokes. That is because the oil which is coming up through the wick is being only partially burned. The carbon, which is about one-half of what the oil contains, is not being burned at all and goes off into the air in little black specks with the gases which are thrown off. The reason the carbon is not burned when the chimney is off is that there is not sufficient oxygen from the air combining with it as it is separated from the oil in the partial combustion that is going on.

To make the carbon in the oil burn you must mix it with plenty of oxygen at a certain temperature, and this can only be done by forcing sufficient oxygen through the flame to bring the heat of the flame to the point where the carbon will combine with it and burn.

When you put the chimney on the lamp you create a draft which forces more oxygen through the flame, brings the heat up to the proper temperature and enables the carbon to combine with it and burn. When you take the chimney off again the heat goes down when the draft is shut off and the lamp smokes again.

The chimney also protects the flame of the lamp from drafts from the sides and above and helps to make a brighter light, because a steady light is brighter than a flickering one.

The draft created by the chimney also forces the gases produced by the burning oil up and away from the flame. Some of these gases have a tendency to put out a light or a fire.

Jamaica.

The English admirals Penn and Venables captured and held the island of Jamaica in 1655. The Spanish were entirely expelled in 1658. The capture was part of the effort under Cromwell to crush Spanish power in the West Indies. The whole island had been divided among eight noble Spanish families, who had so discouraged immigrants that the population in 1653, both white and slave, did not exceed 3,000.

True Enough.

"What is the plural of man, Johnny?" asked a teacher of a small pupil.

"Men," answered Johnny.

"Correct," said the teacher. "And what is the plural of child?"

"Twins," was the unexpected reply.

TOWN COUNCIL.

Council Chamber.

June 5th, 1916.

Council met in regular session on Monday evening, Mayor G. F. Ruttan in the chair.

Present—Reeve Osborne, and Councillors Denison, Ming, Paul, Graham and Steacy.

The minutes of the last regular and special session were read and confirmed.

A communication was read from J. E. Madden, on behalf of his client, Mr. Geo. Walker, Newburgh, asking for \$4.00 damage for broken spring on his automobile, caused by defective road on Dundas street, at the corner of Adelphi street. The accident happened on May 25th.

Referred to the Streets Committee with power to act.

Mr. T. Scrimshaw appeared before the council in reference to his taxes.

Referred to Finance Committee.

A petition was read from John Wilson and others asking the council for a tile drain on the south side of Thomas street, to begin at Mr. Walker's residence and continue east to the creek. The old one is of no value to those who wish to use it. The new drain would be used for drainage purposes only.

Referred to the Streets Committee to report.

Coun. Graham brought to the attention of the council the question of the purchase of a mixer to be used in the building of cement walks. He stated that Mr. Connolly, of Yarker, manufactured a suitable machine at a cost of \$175.00, which might be bought and paid for in one, two or three installments. In his opinion a machine for the purpose spoken of would be a money-saver, to say nothing of the extra efficiency in the cement walks built by the fact of a more perfect mixture of the materials used.

The Streets Committee were instructed to have Mr. Connolly give a demonstration of his machine, and the committee could then report back to the council.

The Fire, Water and Light Committee reported recommending that the supplies asked for by the firemen be purchased by the Committee, and that a report as to prices be made.

The Town Property Committee reported that upon examination they had found the Disposal Works in a very bad shape. They found the sludge well full, and also were of the opinion that water was leaking into the well from the bottom. The filtration beds were also in bad shape, being covered with mud, which prevented them from fulfilling the purposes for which they were put there. They asked that the Town Property Committee be empowered to have the plant put in good working order, also that the present caretaker be furnished assistance in cleaning the sludge well.

Report adopted.

It was afterwards agreed upon that no action would be taken regarding the repairs to the sludge well until an estimate of the cost of such repairs had been submitted to the council.

The Town Property Committee reported that the Public Library was in very much need of repairs. The building needed painting and the windows, roof, eavetroughing, and outside steps needed repairing, and they recommended that the work be done.

The report was adopted, except that portion referring to painting the building.

The Town Property Committee also reported that the Harvey Warner Tablet would probably be in place in the Harvey Warner Park by Thursday, and suggested that Mayor Ruttan and W. S. Herrington, K.C., be asked to be present on a fixed date for the purpose of unveiling the Memorial Tablet. Also that the Citizens' Band be asked to be in attendance.

Report adopted.

A by-law was passed appointing Coun. J. E. Robinson a member of the Court of Revision.

It was finally decided that the Court of Revision meet in the Council Chamber, on Monday next at 7.30 p.m.

Mayor Ruttan, on behalf of the delegation to Toronto, presented the following report, which speaks for

found no precedent in the department to settle the question as this is the first time any school board had ever asserted such a right, but that it was a legal question on the interpretation of the statutes and he referred the matter and the deputation to the Attorney General's office, believing that the opinion of the Attorney General would bind the government and bind all parties interested.

Your deputation then called on the Honourable Mr. Lucas and placed the matter before him and he undertook to give a decision in a very few days which will settle the matter once and for all and thus avoid any friction or any unpleasantness between the school board and the town council.

Your deputation was introduced to the Honourable Mr. Macdormid on the question of a contribution by the government to the town of Napanee, to assist in permanently building sections of the streets of Napanee which are designated as part of the county road system of the county and upon which it is intended to expend the ten thousand dollars (\$10,000) to be raised under the by-law to be voted on on the 19th of June. The Minister assured the deputation that he would do everything possible to assist them and when he received the report of the government engineer which visited Napanee on Friday last he would take up the matter seriously, and if it could be done without embarrassing the government a grant would be made to the town for those portions of the roads which were butted by farm lots, it would be about one and four-fifths miles, which would be roughly about two thousand or two thousand five hundred dollars, and that he would not only send his engineer down to inspect the roads at present, but that the department would furnish a skilled engineer for one or two or more weeks to go to Napanee, and without expense, to superintend the work and see that it was properly laid out and started. The government engineer, when here on Friday, went over the roads and stated that he would report to the department in favor of the town receiving its forty per cent. grant on the one and four-fifths miles of roads, and we have every hope that ultimately a substantial rebate will be obtained from the government which will reduce by that amount the amount of debenture that would require to be sold under the by-law.

Your deputation, when in Toronto, following up the resolution passed by the town council some time since, called upon the Honourable James Duff, Minister of Agriculture, and laid before him the claims of the county of Lennox and Addington to have an experimental agricultural school and farm established in this county for Eastern Ontario. The Minister held out every encouragement to the deputation that the county of Lennox and Addington would be seriously considered as soon as the plans of the government had been settled.

Your deputation then called upon the Honourable Mr. Ferguson in connection with the Hydro Electric purchase of the Seymour Power Co., and in connection with a letter which the town council had received stating that after March 1st, 1916, the Hydro Electric would pay no more taxes to Napanee, which meant a loss of from eight hundred to thirteen hundred dollars per annum of taxes. After a lengthy argument with the Minister

CANADIANS IN TERRIFIC

LONDON, June 4.—Accurate information received tonight M. S. Mercer has been severely injured, and is being removed to hospital at Boulogne.

Gen Victor Williams, who accompanied Gen. Mercer, was also injured and was taken prisoner.

The following four officers part in the recent fighting at London at a late hour tonight: W. Enver, 49th, abrasions; Lieut. Pen, C.M.R., wound; Lieut. Drabble, 49th, wound and suffering from shell shock; Lieut. Paton, C.M.R., scalp. All wounds are slight.

British Headquarters in Saturday, June 3.—(Via London 4, 10.30 p.m.)—Around farm and Sanctuary Wood, the Canadians have been doing the stiffest of their experience in the last two days' action. They the entire front attacked, and the fighting spreads, this is their battle.

The Canadian troops engaged in fighting were in the brigade led by Brig-Gen. Victor T. This brigade included four of the C.M.R., the Princess of Wales Canadian Regiment and the Royal Canadian Regiment.

The German guns had been very quiet for some days, but suddenly opened up the bombardment any Canadian has known, using all kinds of heavy howitzers to the front, not only battering the but covering a wide area of the rear to prevent the bringing of reinforcements.

"But it was not this time, early battles on the Ypres when the Germans threw their shells to our one," said a British gunner returned from the Germans after a time in our trenches.

HAND-TO-HAND FIGHTING

Under support of gunfire, Canadian battalions, maintaining the line of the first contingent at St. Julien, immediately turned the Germans in a series of counter attacks. They fought through the line, were engaged all Saturday, bombing their way back to the position of the position which was lost. Parties rushed in at points, bombing and bayonet and left, and before their fire was ended they had regained a few yards.

The German advance had been over a front of 3000 yards, from Comines railway to Hooze p. was the most extensive front recent attack, and the responded to the test coolly. In the Hooze sector a man attack was stopped with loss.

NO CHANGE ON SUNDAY

The British official statement Sunday midnight, says: "Action around Ypres had not altered. There have been bombardments and our troops the ground regained in other attacks yesterday. No fresh have been undertaken by us."

The British official statement Sunday morning reads: "Fighting of a very severe continued unceasingly at Ypres, between Hooze and the Menin railway. Following initial advantage obtained

demonstration of his machine, and the committee could then report back to the council.

On motion of Councillors Ming and Denison, Mr. Geo. Grieve will be asked to appear before the council in reference to complaints that he is not fulfilling his contract satisfactorily in the matter of street sprinkling, etc.

Mayor Ruttan, on behalf of the delegation to Toronto, presented the following report, which speaks for itself:

To the Municipal Council of the Town of Napanee.

We, your deputation to go to Toronto and interview the several ministers of the crown, on the following matters, report as follows:

We arranged with T. G. Carscallen, M.P.P., and W. J. Paul M.P., and Mr. T. B. German, who is one of the executors of the estate of R. M. Schemehorn, to accompany us to Toronto. The executors of the Schemehorn estate had expressed a willingness to appropriate, a portion of the residue of the estate, which was in their hands to apply to such charities as they saw fit, to be applied upon, first in depositing with the government ten thousand dollars (\$10,000) to secure an income for the Children's Aid Society in the county of Lennox and Addington, and wished to know if the government would accept this amount in trust, to pay over the income at five or six per cent. to the Children's Aid for the county for all time to come, thus relieving the county council to that amount in their liability to support the society. And further the executors said they were ready to give the county sixteen thousand dollars (\$16,000) to construct a House of Refuge for the county and they wished to have the question settled as to whether the government would treat such an amount in the same way as if it had been expended by the County Council and under the statute and advance four thousand dollars (\$4,000) to aid the construction. The town council was willing to supplement this amount by three thousand dollars (\$3,000) in their hands in trust from the Wright estate. Mr. German took advantage of the deputation going to Toronto to be with them and have this question settled. The Honourable the Provincial Secretary assured Mr. German that they would accept the ten thousand dollars (\$10,000) in trust and pay the income on a five per cent. basis for all time to the Children's Aid Society of the county, and that they would treat the sixteen thousand dollars, if appropriated to a house of refuge, as if it were county funds and would guarantee the further advance by the government of four thousand dollars (\$4,000) and he expressed the trust and hope that the executors would apply their residue to these charities, when it was explained to him that the executors were not bound to any particular form of charity in paying out the residue of the estate. The deputation was pleased to aid the matter as much as they could while in Toronto, and no doubt the question will be brought before the county council at the June sittings.

Your deputation waited upon the Honourable Dr. Pyne and explained to him the question as to the right of the school board to carry forward a large balance of about six thousand dollars each year and at the same time make a requisition for a full year's business from the town, and ask the town to strike the school rate on this basis. This matter had been referred by your body to the Finance Committee to look into and consider and they had failed by correspondence to get satisfactory statement of the question by the Minister of Education. The Minister was therefore interviewed by the deputation and he stated that they had been considering the matter seriously but that they had

lars per annum of taxes. After a lengthy argument with the Minister he conceded the fact that properties owned by the government and purchased from the Seymour Power Co., when occupied by tenants, would pay taxes and the tenants should be liable for such taxes, which cover such cases as Hubbard Manufacturing Company, the Waller & Dafeo mill, The Napanee Water Works Co., and the business office of the company on Dundas street. The other question as to how far the contracts between the town and the Seymour Power Co. deprived the government as purchasers from the Seymour Power Co. of the statutory right of being exempt from taxes was referred by the Minister to the Hydro Electric Commission, and your deputation then visited the Hydro Electric Commission, and after a considerable consultation with them they asked for a statement of facts to be prepared and submitted to them when they would go into the matter fully, and conceded that there was a good deal to be considered in favor of the town's position. That Napanee was in a different position from other towns, by reason of its contracts, and unless the government cancelled them by special legislation, they might have a claim for taxes on the whole property. However, this matter will be decided later on, and a brief is being prepared by the mayor to be forwarded to them.

All of which we submit to your consideration.

G.F. RUTTAN, Mayor.
MARK P. GRAHAM.

Napanee, June 5th, 1916.

Moved by Reeve Osborne, seconded by Coun. Graham, that hereafter the Mayor and Treasurer be empowered to advance to the Board of Education such sums of money as they may need from time to time. Carried.

On motion the Collector of Taxes will be notified to finally return his 1915 roll on or before June 19th.

ACCOUNTS.

The following accounts were ordered paid:

Mayor Ruttan.....	\$ 15 80

Children Cry
FOR FLETCHER'S
CASTORIA

Ypres, between Hooge and Menin railway. Followed initial advantage obtained evening in penetrating a line in this neighborhood men pushed their attack night and succeeded in putting defences to a depth of the direction of Zillebeke.

"The Canadian troops who are holding this defensive, launched counter seven o'clock this morning have succeeded in gradually the enemy from much of he had gained. The Canadians with the utmost counter-attacking successfully heavy and continued bombardment.

ENEMY LOSSES WERE

"The enemy losses were large number of German abandoned on the recaptured Generals Mercer and Willi Third Canadian Division, inspecting the front trench day during the bombardment.

"Opposite the lentran near Fricourt, north of Somme, a small party of raided the German line bringing back a few prisoners had a sharp engagement German trench and suffered casualties, but succeeded in several German dugouts.

"Southwest of Angres is carried out a successful Our party entered a German disposed of the garrison and bombed five dugouts tiring, without loss.

"To-day there has been of artillery activity about salient. Yesterday our favored by fine weather, and much successful work."

CLIMAX OF WAR APPROACHING

A Canadian Associated from London this morning is considered here that it is en for granted that the which the Canadians are one of many episodes of the tremendous climax of fast approaching. The Zillebeke is exact in character of Verdun, tho in intensity so far on a much smaller lists certainly make gray yet the length will not stop body who has any realization character of the German bombardment of the Canadian trenches. The enemy's hurried hour after hour, fragments everything living near where they fall. The no immediate and judicious military sense to this kind except to await one's own.

The bombardment with weight such as never has been previous to the last six months on through the night. Th stuck where they were there was anything of a serious earth work to protect the retreating when to remain extermination for all.

Meanwhile the Germans ward a thin spreading of ground which their armor churned into chaos. A nearly half a mile was thus COUNTER-ATTACK ON DAY.

Then in the early morning there came the time viable counter-attack. The machine guns started with watering of the dispute. Afterwards their supporties advanced by short runs their heavy artillery, supported behind, pounded the German disorganize the sending of ments.

NOT "THE" FLEET.

The mauling received by a British fleet at the hands of the German High Seas fleet in the Skagerrack on Wednesday and Wednesday night was serious, but not of such a nature as to endanger British naval supremacy. The reader will do well to keep a firm grip of the fact that it was "a" British fleet, not "the" British fleet, which was so roughly handled by what Berlin admits was the entire German High Seas fleet. When the main British fleet, hurriedly steaming to the scene of action, appeared the Germans left off pounding the overmatched ships they had engaged and scuttled back to port. That was good tactics, and nothing of which to be ashamed.

There will be no little controversy as to whether the Commander of the small British fleet which first encountered the full strength of the German High Seas fleet should not have retired when he saw what he was up against instead of giving battle with the odds so greatly in the enemy's favor. The German High Seas fleet as constituted for service in the North Sea consisted at the outbreak of war of not less than sixteen Dreadnought battleships and four Dreadnought cruisers. If the Baltic squadron was absorbed in it before Wednesday's battle there might have been eighteen Dreadnought battleships and eight fairly good pre-Dreadnoughts in the fleet, besides four very modern and fast battle cruisers. The battleship Pommern, which was admittedly sunk, was a pre-Dreadnought, and this leads to the belief that every modern fighting battleship Germany had was pressed into the service of the enemy in what Berlin speaks of as an "enterprise northward," which had to be abandoned after the Skagerrack battle. The losses sustained by Germany are not yet known. The sinking of the Pommern and the light cruisers Wiesbaden and Frauenlob is admitted by Berlin. The British Admiralty states that in addition either the great Derfflinger or the Lutzow was blown up, another battleship was seen to be disabled, and a third was seriously injured. One battleship of the Kaiser class of Dreadnoughts is also believed to have been blown up, and a second Dreadnought battleship sunk. These losses if verified would be much more

Frauenlob... ..	2,600	270

SMALL CRUISERS (1).		
	Tonnage	Complement, Men
Wiesbaden—Tonnage and complement not given.		

Admitted German loss in tonnage, 15,800. Tonnage of small cruiser Wiesbaden not included.

BRITISH CLAIMS.

German dreadnoughts of the Kaiser class blown up; one German cruiser blown up and another disabled; one German submarine sunk.

German battleship, Derfflinger or Lutzow, blown up. Another German battleship disabled and a third seriously damaged.

One German light cruiser and six German torpedo-boat destroyers were sunk and at least two more light cruisers were disabled.

Britain does not admit German claim that Battleship Warspite, tonnage 27,500, complement 1500 men, and armored cruisers Achilles I. and Achilles II., each with a tonnage of 13,550 and complement of 720 men, were sunk.

LONDON, June 2.—Picking its way from its base in the Kiel Canal, the German high sea fleet on Wednesday afternoon emerged into the North Sea, and off the coast of Jutland engaged a British fleet thruout the afternoon and night in what probably was the greatest naval battle in the world's history to far as tonnage engaged and tonnage destroyed was concerned.

When the battle ended Great Britain had lost the battle cruisers Queen Mary, Indefatigable and Invincible, the cruisers Defence, Black Prince and Warrior and eight torpedo boat destroyers, while the German battleship Pommern had been sent to the bottom by a torpedo and the cruiser Wiesbaden sunk by the British gunfire. In addition several German tor-

peated hits were observed other German battleships engaged.

"Finally, a German submarine rammed and sunk."

SIX ZEPPELINS IN

Six zeppelins participated gagement, according to front Copenhagen to The 1 One of the dirigibles, the hit several times and badly the report says, but she w reach the Schleswig coast a row escape. Several of her wounded, and all of her su to be thrown overboard.

A despatch from the same clares it is generally state lin that the activity of t fleet was due to energeti af Emperor William to h Admiral Prince Henry of commander-in-chief of the r Admiral Von Capelle, minis navy, on the emperor's week to Wilhelmshaven.

WHAT PAPERS SA

The Graphic says this mo "The statement publishe admiralty is probably the of news that the governme had to communicate to th It may be that our cruiser was deliberately trying to the German main fleet and arrival of our main fleet v ed. Or it may be that the with the advantage which lins gave them, were able down upon our too ventur sels. The grave fact is tha splendid ships and guns t take many long months and that we have lost fore thousand gallant seamen.

"All we can note on the of the account is the recog the Germans of the superio main fleet. As soon as ships appeared the Germ drew to the shelter of the Nor is there the least reas that the terrible losses of will leave us with an margin of naval strength."

A despatch to the Exch graph from Copenhagen, se

"During the retreat of t fleet large numbers of m thrown out. To-day (Frid) German floating mines wer the North Sea. Fishermen a cruiser struck a mine northwest of the Wyl Ligh side Blaavandshuk. Only a of the crew were saved."

CONSTERNATION IN L

The news was flashed out editions of the evening and caused greater conster the west end of London been witnessed on any pre casion since the declaratio The frankness of the adn nouncement concerning the ture of the British losses a parently small losses of th in comparison led to the t in most minds that the Br sals must have been led in

class of Dreadnoughts is also believed to have been blown up; and a second Dreadnought battleship sunk. These losses, if verified, would be much more serious than those of the British fleet.

The British battle cruiser fleet as it went into action consisted probably of eight Dreadnought cruisers. Four battleships—also, no doubt, of the Dreadnought type—were the other capital ships engaged. Of these Dreadnoughts three, the Queen Mary, Invincible and Indefatigable, were sunk. The Invincible and the Indefatigable were fine, fast ships, armed with eight 12-inch guns, and with what was regarded as adequate armor when they were built in 1907-09. The Queen Mary was almost the last word in naval design. She was completed only three years ago, and had a recorded speed of 31 knots. Her big guns numbered eight, and were of 13½-inch calibre. Her principal armor belt was over two inches thicker than that of the other battle cruisers sunk. The Black Prince, Defence and Warrior, the lost armored cruisers, were all good ships, but Britain is still very strong in this class of vessel, and the Queen Mary in a naval Armageddon ought to have been worth a dozen of such ships. The eight destroyers sunk can be made good speedily. The output is continuous.

How serious the loss of life has been is not known. If the battle cruisers sank suddenly in action their crews went down with them, and we have already learned that German warships do not draw out of the battle-line to aid drowning foes. The loss of life may total over six thousand of Britain's finest fighting men, trained in the use of the latest naval mechanism of war. That is the most serious feature of the battle of Skagerrack. The German loss of trained men, if the ships sunk number only three—a battleship and two light cruisers—would not exceed 1,500 men. A number of German destroyers were also lost, and it would not be unreasonable to add 500 men as a fair total for their crews. The British death roll of 6,000 or more will, if no other losses are reported, bear about the proportion to Britain's naval enrollment as the German loss of 2,000 bears to the total of her trained seamen and engine-room crews.

bottom by a torpedo and the cruiser Wiesbaden sunk by the British gunfire. In addition several German torpedo craft were missing and the small cruiser Frauenlob had last been seen badly listed and was believed to have gone to the bottom. The losses have all been admitted by Great Britain and Germany.

OTHERS IN THE LIST.

Aside from Great Britain's conceded losses, Germany claims that the British battleship Warspite, sister ship of the Queen Elizabeth, and one of the largest and most powerful ships afloat, had been sunk; that the battleship Marlborough, a vessel of 25,000 tons, had been hit by a torpedo and a submarine had been destroyed. Great Britain also added to Germany's acknowledged losses, with the claim that one dreadnought of the Kaiser class—vessels of 24,700 tons, and carrying a complement of 1088 men—had been attacked and destroyed by British torpedo craft, that another battleship of the same class was believed to have been sunk by gunfire, that one battle cruiser had been blown up and two others damaged, and that a submarine also had been sent to the bottom.

Great Britain's admitted loss in tonnage was 114,810 for the six battle cruisers. That of Germany, excluding the tonnage of the Wiesbaden, of which vessel there is no record, 15,712. The tonnage of the capital ships sunk by the Japanese in their fight with the Russians in the battle of Tsushima, in May, 1905, aggregated 93,000. Twenty-one Russian craft were destroyed in this fight, including six battleships and four cruisers. The remainder of the sunken craft comprised coast defence and special service vessels and torpedo boats.

CASUALTIES WERE HEAVY.

That the casualties in the fighting off Jutland were heavy is indicated by the fact that of the crew of some 900 on board the Indefatigable only two men are known to have been saved.

Full details of the fight, in which zeppelins are declared to have taken part, are being gathered by the British Admiralty, and pending their receipt the censor is withholding permission to correspondents to send out stories from London.

An additional British official communication just issued, says:

"Since the first communication was issued a further report has been received from the commander-in-chief of the grand fleet, stating that it has now been ascertained that our total losses of destroyers amount to eight boats in all.

"The command-in-chief also reports that it is now possible to form a closer estimate of the losses and the damage sustained by the enemy fleet.

"One dreadnought battleship of the Kaiser class was blown up in an attack by British destroyers and an other dreadnought battleship of the Kaiser class is believed to have been sunk by gunfire. Of the German battle cruisers, two of which are believed to be the Derfflinger and the Lutzow, one was blown up; another was heavily engaged by our battle fleet and was seen to be disabled and stopping, and the third was observed to be seriously damaged.

"One German light cruiser and six German destroyers were sunk, and at least two more German light cruisers were seen to be disabled. Further,

in comparison led to the belief in most minds that the British must have been led in the field.

Following quickly upon the official announcement came the general, confirms the British but carries the claim that the ship Warspite also was sunk. British battle ships damaged.

The German losses, according to the German version of the war, were the small cruiser Wiesbaden by gunfire, and the warship Frauenlob by a torpedo, while the boats are missing.

BIG GERMAN FLEET

A Copenhagen despatch according to the Politiken, steamer arrived to-day (The Friedrichshaven, which had a battle in the North sea yesterday) afternoon, 120 miles from Stockholm it was stopped by British torpedo boats to have examined.

At the same moment a German fleet appeared and the warships immediately prepared for action. The German fleet, which approached at full speed, consisted of five large, modern dreadnought cruisers and 20 torpedo boats.

Suddenly the Germans began to fire and several hundred shells around the torpedo boats, however, hitting them.

The British ships were pursued by the German fleet. At 6 o'clock the cannonade was continued until nine of the evening.

Two zeppelins were seen flying full speed northward to the battle.

The National Tidende says last night ten German destroyers passed through the straits from the north, going west. The newspaper adds that the boat, badly damaged, is Lyngvig Fyr near Ringkøbing, western Denmark, just north of Horn.

ZEPPELIN IN ACTION

A despatch from Ringkøbing, to Reuter's under Thursday, delayed by the censor, says:

"From four o'clock yesterday (yesterday), and during the night, a heavy cannonade was heard from several points on the coast of Jutland. Many were broken here and people were sent to ascertain the meaning of the firing.

"At midnight a zeppelin was seen over the coast. At 11 this morning a German destroyer, the Noerre, Lyngvig Lightship was in trouble and unable to proceed. At three o'clock in the afternoon a German destroyer arrived at the coast an hour later with the disabled ship in tow."

EIGHT DESTROYERS

The British admiralty officially announced last night that a number of British destroyers were lost in the naval engagement was.

The announcement adds that three German battle cruisers were lost. The Derfflinger and Lutzow were up, another was seen to have been disabled and be seriously damaged.

FAMOUS CRUISER LOST.

There were no more celebrated bat-
tle-scarred veterans of the British
navy than the battle cruiser Queen
Mary, Indefatigable and Invincible.
The Queen Mary played a prominent
part in the Helgoland-Bight engage-
ment under the command of Captain
William Hall, who has since been pro-
minent as chief of the intelligence di-
vision of the admiralty. The Queen
Mary missed the dogger Bank action
by being in dry dock for minor re-
pairs. A few weeks ago a large part
of her crew came to London of shore
leave and upon their departure Cap-
tain Hall, their old commadoer, came
to say farewell to them.

The Indefatigable and Invincible
bore scars from the Falkland Islands
encounter, which they had a pro-
minent share in sinking Admiral Von
Spee's squadron, and from the Dar-
danelles, where they played a leading
part in the bombardment of the
straits. They also had participated
in previous North Sea actions.

When the Associated Press corres-
pondent visited the battle cruiser
fleet in the fleeth Sea last winter
these three vessels were exhibited as
the pride of the fleet, which had just
come in from a scouting cruise which
took them to the German coast. The
Queen Mary was pointed out as the
finest type of speed and gun power in
the British navy.

Enemy's Naval Losses Heavier Than Britain's In Every Way

The British Admiralty "entertain no
doubt that the German losses are
heavier than the British, not merely
relatively to the strength of the two
fleets, but absolutely.

COURT OF REVISION.

Selby, June 5th, 1916

The Court of Revision was held on the above date.
Members present were:—Carleton Woods, Reeve, Councillors R. Z. Bush,
Walter Russell, E. R. Sills and Austin Hartin.
Having taken the necessary Oath of office they took their seats at the
Council Board.

Moved by W. Russell, seconded by R. Z. Bush, that Carleton Woods be
chairman. Carried.

Moved by R. Z. Bush, seconded by W. Russell, that upon appeal of
Christie Thompson his assessment be reduced \$200.00. Carried.

Moved by A. Hartin, seconded by E. R. Sills, that John H. Hughes'
assessment be reduced \$100.00. Carried.

Moved by R. Z. Bush, seconded by W. Russell, that the assessment of
Wm. Spencer be divided, he having sold part of property to Amos
Deshane, 300 to be retained by Wm. Spencer and 520 added to Amos
Deshane. Carried.

Moved by E. R. Sills, seconded by A. Hartin, that the assessment of
Peter O'Connell be sustained. Carried.

Moved and seconded that the assessment roll as returned and revised
at the Court of Revision be adopted as the assessment roll for the Town-
ship of Richmond for the year 1916. Carried.

JAMES MCKITTRICK.

Township Clerk.

MINUTES OF RICHMOND COUNCIL.

Selby, June 5th, 1916

The Council met at Selby:

The members present were:—Messrs. Carleton Woods, Reeve, Councillors
R. Z. Bush, Walter Russell, E. R. Sills and Austin Hartin.

The Reeve presiding. The minutes of the last meeting were read and con-
firmed.

Moved by W. Russell, seconded by E. R. Sills, that George Walker be
given an order for \$1.00 on the Treasurer as refund as error in dog tax
for year 1915. Carried.

Moved by W. Russell, seconded by R. Z. Bush, that W. H. McLeod, As-
sessor for the year 1916, be paid \$60.00 for assessing Township. Carried.

Moved by Austin Hartin, seconded by E. R. Sills, that the Clerk be
given an order on the Treasurer for \$15.00, for postage and stationary,
and extra work. Carried.

Moved by W. Russell, seconded by R. Z. Bush, that this council grant
\$100.00 to be expended on Tyendinga Boundary, north of Kingsford, pro-
viding Tyendinga Council grant the same both to supplement government
grant of \$200.00. Carried.

Moved by E. R. Sills, seconded by Austin Hartin, that this council
grant \$50.00 to be expended on Camden Boundary, in the 4th Concession,
providing Camden Council supplements the same to be expended under the
supervision of Richmond Township Engineer. Carried.

Moved by R. Z. Bush, seconded by Austin Hartin, that W. A. Eng-
lish, road engineer, be given an order on the Treasurer for \$35.80, this
being pay sheet No. 1. Carried.

Moved by W. Russell, seconded by E. R. Sills, that the By-law govern-
ing grant of \$300.00 to Township of Richmond, be given its third reading,
signed and sealed and returned to the Department. Carried.

Moved by A. Hartin, seconded by E. R. Sills, that the following parties
be paid 10c. per rod for building wire fences along the roads in Rich-
mond: Walter Woodcock for building 37 rods, \$3.70; S. E. Winters for
building 22½ rods, \$2.25. Carried.

Moved by R. Bush, seconded by Russell, that the following accounts be
paid: E. Pringle, account for repairs on snow-plough, by order of path-
master, \$3.50; John McCaul for furnishing material and building culvert
on road division No. 90, by order of pathmaster, \$2.00; T. Windover's ac-
count for supplies furnished Richard Lloyd \$2.88; Peter Hart for repairs
on stone crusher, \$12.25; Hawley Lasher for furnishing material and
building culvert in road Division No. 81 \$8.00; Mrs. Levi Doney, for
month of June as aid, \$5.00; Reeve for legal advice \$2.00; Levi Huffman,
for drawing gravel and repairing bridge on Belleville road, \$18.00. Car-
ried.

Moved and seconded that this Council adjourn to meet on the first
Monday in July, at the hour of 10 o'clock a.m. Carried.

JAMES MCKITTRICK,

Township Clerk.

most powerful type, and two of the
latest light cruisers, in addition to
smaller craft, including a submarine.

RESULTS ARE QUITE PLAIN.

The text of the statement follows:
"Until the commander-in-chief has
had time to consult the officers en-
gaged, and write a full despatch, any at-
tempt to give a detailed history of the
naval engagement, which began on
the afternoon of May 31, and ended in
the morning hours of June 1, would
evidently be premature. But the re-
sults are quite plain.
"The grand fleet came in touch with

An additional casualty list of petty
officers shows that 43 of them were
saved from the Queen Mary, Invin-
cible, Fortune, Ardent and Shark.
None were saved from the Indefatig-
able, Defence, Black Prince, Tipper-
ary, Turbulent, Nomad or Nestor.

The list gives the names of 65 men
killed aboard the Warrior and of 27
men wounded.

BRITISH LOSSES.

No addition to list published Sat-
urday morning, consisting of three
battle cruisers, three cruisers and
eight destroyers—total, fourteen.

LONDON, June 4.—The British Ad-
miralty to-night issued a statement
saying there was the strongest
grounds for the belief that the Brit-
ish navy, in the battle with the Ger-
mans off Jutland last week had ac-
counted for a total of eighteen Ger-
man men-of-war, and that there was
nothing to add to or subtract from
the original announcement of the Brit-
ish losses.

The statement gave the German
losses as two battleships, two dread-
nought battle cruisers, four light
cruisers, nine torpedo boat destroyers
and a submarine.

The pessimism which prevailed as a
result of the admiralty's original
statement of losses, which is now con-
sidered to have been needlessly candid
and conservative in underestimating
the extent of the German losses as
compared with those of Great Brit-
ain, has been greatly lessened by the
latest statement.

GERMAN ACCOUNTS ARE FALSE.

The admiralty reiterates that the
German accounts of the German losses
are false, and that altho the evidence
is still incomplete, enough is known to
justify stating that the German losses
were greater than the British "not
merely relatively to the strength of
the two fleets, but absolutely."

There is the strongest ground for be-
lieving, says the statement, that the
German losses include two battleships,
two dreadnought battle cruisers of the

afternoon of May 31, and ended in
the morning hours of June 1, would
evidently be premature. But the re-
sults are quite plain.

"The grand fleet came in touch with
the German high seas fleet, at 3.30 on
the afternoon of May 31. The leading
ships of the two fleets carried on a
vigorous fight, in which the battle
cruisers, fast battleships and subsid-
iary craft all took an active part.

"The losses were severe on both
sides, but when the main body of the
British fleet came into contact with
the German high seas fleet a very
brief period sufficed to compel the
latter, who had been severely punish-
ed, to seek refuge in their protected
waters. This manoeuvre was render-
ed possible by low visibility and mist,
and altho the grand fleet were now
and then able to get in momentary
contact with their opponents, no con-
tinuous action was possible.

CONTINUED PURSUIT TILL DARK

"They continued the pursuit until
the light had wholly failed, while the
British destroyers were able to make
successful attacks on the enemy dur-
ing the night.

"Meanwhile, Admiral Sir John Jel-
licoe, having driven the enemy into
port, returned to the main scene of
the action and scoured the sea in
search of disabled vessels. By noon
the next day, June 1, it became evi-
dent there was nothing more to be
done. He returned, therefore, to his
base, 400 miles away, refuelled his
fleet, and in the evening of June 2
was again ready to put to sea.

LIST OF CASUALTIES.

The official list of the casualties
among officers shows that hardly a
single officer of the line escaped from
the British cruisers sunk in the battle.

view to-day, while contending strong-
ly for the view that there was no
failure in the British strategy, and
that Vice-Admiral Beatty won a
brilliant success, tho it was dearly
bought, declares that the only mistake
made was by the admiralty in allow-
ing the Germans to get first in the
field with the news of the battle, or,
as he puts it, with "impudent fabrica-
tions." Otherwise, said Lord Beres-
ford, no fault can be found with the
admiralty.

MANY OFFICERS ARE LOST.

Rear Admiral the Hon. Horace
Lambert Hood, second in command to
Vice-Admiral Sir David Beatty, and
Captains Sowerby, Cay and Prowse,
were lost, with many others, whose
names are not yet known because the
admiralty has not so far issued any
casualty list. There were no surren-
ders, and the ships went down, carrying
with them virtually their whole crews.
Only the Warrior, which was towed
part way from the scene of the battle
to a British port, was an exception.

Of about one thousand men on the
Queen Mary, only a corporal's guard
is accounted for. The same is true of
the Invincible, while there are no
survivors reported from the Indefatig-
able, the Defence or the Black Prince.

STILL HOLDS SUPREMECY.

British naval experts maintain that
Great Britain continues to hold the
supremacy of the sea by a safe margin,
and that her enormous navy could
better afford the losses it suffered than
could the Germans. The first reports
of the heavy loss of life, unhappily,
have not been revised. Great Britain
mourns for more than 4000 of her
seamen, while the German loss is
variously estimated at between 2000
and 5000.

The Sugar Mother Uses.

ST. LAWRENCE SUGAR

SYNOPSIS.

Dudley Larnigan, district attorney of New York, attacks the liquor and vice trusts. He is killed by an agent of a secret society, the committee of fifteen. His son, Bruce Larnigan, is elected district attorney and takes up the fight. Bruce is in love with Dorothy Maxwell, whose father is head of the insurance trust.

Bruce Larnigan is decoyed to an evil resort in an effort to frame him up. He beats the conspirators by having the police commissioner present. A fire starts in a tenement across the way. Larnigan saves the children of Dow, one of the conspirators. This man agrees to expose the trust. He is murdered by the gang.

BRUCE LARNIGAN'S crushing defeat of the tenement house trust, resulting in the murder by the graft syndicate itself of Anton Dow, who was about to give Bruce evidence against the fifteen, served to show Stanford Stone and the remaining members of the graft syndicate that in Bruce they faced a foe far more dangerous to them than his murdered father had ever been.

Stanford Stone, the secret head of the powerful graft syndicate, had despised Bruce in the beginning. Now he was beginning to fear him. And the fact that he was in love with Dorothy Maxwell, the girl who was Bruce's fiancée, only increased his determination to get rid of Bruce.

It was impossible for Stanford Stone to work in the open. It seemed to him vitally important to hold secret his own connection with the graft syndicate. Even Bruce Larnigan was so far from suspecting it that after the death of Anton Dow he confided many of his plans for the future to Stone.

"Dow's death is unfortunate," he told Stone. "He was a villain, but he was about to turn over a new leaf. He would have been a useful witness too. However, I have other plans in

Bruce he knew was coming to see him. Afterward Bonner should be able to take him through the park. And then—the graft syndicate's most dangerous enemy would be removed!

Bruce arrived while Black was still discussing his plans. With him was Dorothy Maxwell.

"We're not really together, Mr. Stone," she said gayly. "I'm looking for papa. I thought he might be here."

"I'm sorry he isn't, Miss Dorothy," said Stone. "But if you'll call up Boyd Penrose's office I think you'll get him. I'll take Larnigan outside while you telephone."

Dorothy smiled her thanks. She was left alone and by pure accident picked up the dictaphone receiver. To her horror and amazement she heard Black giving the final orders for Bruce's murder. Her heart almost stopped, but she managed to control herself and heard enough to put her in possession of all the details of the plot. Then, schooling her features, she went out and joined Bruce and Stone.

"I think I'll go straight home. I can't reach papa," she said. "Coming, Bruce?"

He nodded a farewell to Stone and went down with her. At the curb she seized his arm.

"Bruce, where are you going?" she asked tensely.

"To see an old friend—Jim Stevens," he said. "He's a newspaper man, and we're going to pull off a stunt together." "Let me take you there," she urged. "Please, Bruce! Send Bonner home alone. I want to show you how my new car runs."

He thought nothing of her request and was glad to yield. Bonner, startled and dismayed, saw what had happened, and at once, instead of going home as he was told to do, he hurried to Black.

"Damn!" said Black. "Well, we'll have to get those fellows and plant them near Larnigan's house. Come on; take me through the park. It's riskier, but that can't be helped."

Bonner obeyed. They hurried into the park, and at the fatal spot, as Black stood up, a volley rang out. The gun men had mistaken their employer for their victim. Black fell dead!

Meanwhile Dorothy had waited for Bruce during his talk with Stevens and had then driven him home. They found Mrs. Larnigan in tears. The holder of the mortgage on her house had arbitrarily refused to give her

A new danger threatened, however, for Stanford Stone had been in the office of Stevens' paper talking to the managing editor when the reporter made his report. Unseen by Stevens, he had heard everything and so knew that Bruce, in disguise, was working as a laborer in the subway. At once he saw a chance to crush his enemy. He went to Penrose, and the two concocted a new scheme for Bruce's destruction.

Bruce, suspecting nothing, was pleased by the praise that Kelly, ostensibly

"Everything will come out all right," said Dorothy.

the foreman of the work, but actually the personal representative and graft collector of Penrose, gave him for his work.

"Sure, an' you do well for a green-horn," said Kelly. "I'll be after raisin' your pay and givin' ye better work to do."

Bruce grinned his thanks. He was disposed to like Kelly and to believe that the man did not understand the rottenness of the work that was being done. Kelly, as was afterward to appear, was a good actor wasted on the job he held. He refused, in spite of Penrose's urgency, to be hurried.

"You'd be wantin' him to smell a rat," he said. "He's no fool, that lad. He takes careful handlin'—such as he gets from me. Lave it to me, Misther Penrose. I'll see that he goes to kingdom come. Lave it to Kelly!"

Day by day Kelly saw to it that Bruce got better work and more important to do. He praised him, encouraged him. And he did lull Bruce's suspicions, so that when at last he was ready to strike Bruce trusted him.

"It's toime yez learned the blastin'. That's the work that pays!" said Kelly. "Take this dynamite cartridge, now, and carry it into the tunnel. The place to set it is marked wid a red cross. The hole the driller left is there. Ye see, ye carry the wire along. Then when yez come back ye report and make the contact—and biff! Alsy does it—see! Don't be droopin' that

THE BLESSING A HEALTHY

Has Not Had An Hour's Sick
 Taking "FRUIT-A-TIVE"

MR. MARRIOTT
 73 Lees Ave., Ottawa

August
 "I think it my duty to tell you that 'Fruit-a-tives' has done for me. Three years ago, I began to go down and tired, and suffered from *Liver and Kidney*. Having read of 'Fruit-a-tives' I thought I would try them. It was surprising. During the past, I have taken them regularly and would not change for anything. I *had not had an hour's sickness* since I commenced using 'Fruit-a-tives'. I now know what I haven't known for a good many years—that is, of a healthy body and clear brain".

FOR THE CHILD

A Story For the Little
 When Sleepy Time Comes

THE BEAR AND BUTTER

Information and Amusement
 ed by a Map of the World
 Many Things of Interest
 People—A Sweet Miss Friend

"Uncle Ben, won't you please tell me a good night story?" asked Dorothy and Polly Ann as sleepy, stealing along in the gloom, said Uncle Ben, and he told them a story of

A BEAR AND A BUTT

A large and ferocious bear
 in the middle of a great forest

was about to turn over a new leaf. He would have been a useful witness too. However, I have other irons in the fire. I am more and more convinced that all the graft in this city runs ultimately to a central spot; that one man dominates all the corrupt elements. I can't strike at any particular form of graft, no matter what it may be, without weakening that great central power."

"That sounds reasonable," said Stone sympathetically.

"Now, for instance," said Bruce, "I am planning to look into the opera-

Dorothy Picked Up the Dictaphone Receiver.

tions of the traction trust. I am convinced that whole organization is riddled with graft and that the city is being looted right and left in connection with the new subways. I haven't got all my evidence yet, but I'm going after it. And I may need your help."

"I am at your service," said Stone. "As I've told you before, I feel, as a public spirited citizen, that it is my duty to uphold you in the fight you have undertaken."

But no sooner was Stone alone than his face was transformed and twisted by hate and malice. Without delay he sent for Amos Black, one of his confidential agents. He told Black that Larnigan must be killed.

Black was one of a number of characters of the underworld through whom Stone worked at times.

Through men and women known to him he got into touch with Bruce Larnigan's chauffeur. This man, seemingly respectable and actually faithful enough to Bruce, had a dark spot in his life. Black managed to learn of this and so got the man Bonner into his grip. He arranged to have Bonner drive Larnigan through the park while gunmen were planted there.

Stanford Stone by means of a dictaphone was able to keep in close touch with Black's movements, since he never for a moment trusted Black. On the day after his conversation with Bruce, however, Stone, listening over the dictaphone, nodded with approval.

found Mrs. Larnigan in tears. The holder of the mortgage on her house had arbitrarily refused to give her more time, and her lawyer had told her that he had found no one willing to take it up, good as was the security. Bruce saw in this a plot on the part of the fifteen to punish him. But Dorothy, without telling him of her intentions, determined to save him.

"Everything will come out all right," Dorothy assured Bruce.

She had some property of her own, and she went straight to her father and asked him to advance her a large sum on certain securities. He laughed as he did so, giving her the money in cash.

"What do you want it for?" he asked.

She told him, and, though she saw the startled look that came into his eyes, she did not know the reason nor that it was Roger Maxwell's insurance company that had threatened to foreclose on Mrs. Larnigan's house. Yet it was true—she had unwittingly defeated a plan concocted by her father and Stanford Stone.

Maxwell said nothing to Dorothy of the truth. Perhaps he dared not. Perhaps it was because just after he learned what she meant to do Bard Penrose, his old friend, and his daughter, Mabel, one of Dorothy's best girl friends, were announced. Penrose was head of the traction trust. He and Maxwell had many interests in common. And in the course of the talk the incident of the mortgage seemed to be forgotten.

It was the next day that Bruce and his friend, Jim Stevens, the reporter, went to work on the new subway, having decided that this was the best chance they had to secure first hand evidence of an incontrovertible sort against the trust. Nor were they wrong. In a very short time they discovered the truth of what they had suspected—that a city inspector was being bribed to pass an inferior grade of cement in the construction work.

"The graft in that might run to millions!" said Jim, appalled. "And the danger—my God! The whole thing might collapse at any minute!"

"Get the facts down—and print them," said Bruce. "I'll stay here to get more evidence if I can. I don't think they suspect us yet."

Stevens obeyed. But at the office of his paper instead of being praised for his enterprise in securing a wonderful story he was bitterly attacked by his managing editor. Stevens had not known it hitherto, but his paper was a tool of the graft syndicate and was preparing at that moment to launch a bitter attack upon Bruce Larnigan. The story Stevens turned in was torn up. He himself was summarily discharged.

But that, as it turned out, was a false move, for it only aroused the fighting blood of Stevens. He went from newspaper to newspaper, until finally in the office of the Independent he found an editor with courage enough to face the consequences of defying the trust.

"They may smash us," he said, "but Larnigan is in the right, and we'll back him up. We'll begin by printing your story and putting you on our staff. Go out and get as much more stuff of this sort as you can."

Then when yez come back ye report and make the contact—and biff! Aisy does it—see! Don't be droppin' that stick!"

Bruce obeyed, working his way into the tunnel. But above, when Kelly came out, Penrose was waiting by the electric switch.

"Aisy does it, sorr!" said Kelly. "Give him time to get the end and startt back. Then I'll touch the switch—and good night Larnigan!"

"Splendid!" said Penrose. "Here, I must get my girls out. They're inspecting the work. I don't want them to take any chances."

Dorothy and Mabel, indeed, were near by. And Dorothy had recognized Bruce. She had an accomplishment that few of her friends suspected—she could read lips. And so, though out of hearing, she knew what Kelly and Penrose had said. At once she slipped into the tunnel after Bruce.

"Come quickly! There's a plot to kill you!" she screamed. "Drop that stick and—up! Don't ask me how I know!"

Bruce obeyed. Together they ran for the street. And just as they got out of the tunnel there was a dull roar behind them. Bruce had escaped.

But the blast had unforeseen consequences, for the rotten cement gave way, the street fell in, and Bard Penrose, sitting in his automobile, was sent to his death.

MYSTERY OF A DREAM.

He Heard True When Asleep and Heard True, Too, When Awake.

"In one of the East Indian border wars there was engaged an officer of high repute, the member of an ancient county family," says Mrs. Mayo in "Recollections of Fifty Years." One night the laird, its head, started from his sleep, exclaiming:

"There's the shot that has killed my brother!"

"His wife told him it was but a dream. He must have given an anxious thought to his brother before going to sleep.

"The next day the laird and his wife were in the garden directing their gardeners when the laird suddenly exclaimed:

"Do you hear the bagpipes?"

"No," answered the lady. "I can hear nothing. I am sure there is no sound."

"Strange," said the laird, "for I can even hear what is played. It is 'The Flowers o' the Forest Are A' Wee Away.'"

"A few hours later came the telegram reporting that the brother had been shot down by some border warrior and over his lonely grave the men of his regiment had played the pathetic air whose mysterious echo seemed to have reached the laird."

A large and ferocious bear in the middle of a great forest fierce and terrible was he in the forest all to himself, for animals who used to live there when they saw him coming.

At last he met a butterfly, beautiful blue and gold but when the bear discovered it tinging on a wild rose eating. The bear was so delighted something to scare that th gave sounded almost amiable. But instead of showing any fits the butterfly continue eating breakfast, just as if had not spoken. At this the angry. So he gave severest loudest and fiercest roars. was all through the butter and said politely, "Excuse me say anything?"

"Say anything?" repeated "Didn't you hear me? A frightened?"

"Frightened!" echoed the "What should I be afraid of?"

"Why, of me, of course," bear. "Everybody's afraid of"

At that the butterfly laughed. "You don't suppose so terrible, you silly creature said. "You are the one that frightened. There is something behind you, and it follows you go."

The bear looked over his shoulder. "Oh, you can't see it," said terfly. "But it's behind you same."

"Goodness gracious me!" bear. "What is it?"

"I shan't tell you," replied fly, "but if I were you I'd how I behaved."

"Thank you so much for telling the bear, quite meekly particularly careful, and I was and romp and roar and sc ever any more. Goodbye, M fly," and he tiptoed back to

When he had gone the laughed and laughed. "Still she said. "Of course there's behind him that he can't see only his own tail!"

NECKWEAR AND VEILINGS.

Fashion Cues About Two
of the Important Accessories.

Among neckwear it does not matter
what the design of the collar if it has
an open front. While there are a few
extreme dresses seen with high collars,
the majority are made with low, flat
collars or those with high backs and
low fronts.

Some cape collars are made to lie
flat, while others have collars with
high standing backs attached, with the
points turning on either side forming
a V.

There are many attractive styles in
collar and cuff sets. The collars may
be either flat or with a high back and
low V front. The cuffs are medium
in depth and follow out the design of
the collar. Some sets are simply fin-
ished on the edge with hemstitching or
a picot edge, while others are elabo-
rately trimmed. Ruffles of lace or net
about an inch in width are sometimes
arranged on the edge in as many as
four rows and are finished at the head
with hemstitching. The same idea is
carried out on the cuffs. Among novel-
ties are leather collar and cuff sets.
They are in colors as well as white.

Guimpes and vestees are in many at-
tractive styles. Net, organdie, batiste,
volle, marquissette and georgette crape
are the materials employed in their
making, with embroidery and lace for
trimmings.

Plaittings of net, organdie and malines
are used in various ways. Plaittings on
wide bands are used to wear inside of
a high fur or coat collar. Plaittings are
also used in making collars, the plait-
ings being used on both the upper and
lower edge of the ribbon band sur-
rounding the neck.

Loose flowing face veils will be much
worn this spring. Some are circular;
others are draped. The circular veil
with a round opening in the center
which fits over the crown of the hat is
used to quite an extent. Lacy effects
with woven scroll patterns are espe-
cially effective in veils of this kind.
Some are gathered on to an elastic
band, allowing it to be adjusted over
the crown of the hat. Some hang in
straight lines to the shoulders, while
others are finished with a ruche or
band, which may be caught around the
throat. Veils usually match the color
of the hat.

FOR NEEDLEWORKERS.

A PLAY UNIFORM.

Small Tots Find This Kind
of an Apron Amusing.

King's blue linen fashions this qual-
little uniform for five-year-olds. The
edges and huge, grownup pockets are
bound with dark blue silk braid, and

ing, lay the ball in a buttered bowl
and butter the surface of the dough to
keep it soft. Cover and let it double
in a warm place, an hour to an hour
and a half. If you wish still further
to hurry it set the bowl in warm wa-
ter and place a smaller bowl of warm
water on the lid of the large bowl con-
taining the dough.

When doubled shape quickly into the
baking pans for the second rising and
bake when again light. This recipe is
excellent for use when one must have
bread in a hurry. Half of the dough
may be made into crusty rolls.

Shampoo For White Hair.

The very best shampoo for white
hair is the white of an egg beaten into
a pint of soft, cool water. Rub the
hair with the egg, making a soft lath-
er, after wetting the hair with cold wa-
ter and finish the same as with other
shampoo, except in the last rinsing wa-
ter, which should be cold. A few drops
of the best indigo, not ordinary blui-
ng, should be added to tinge the wa-
ter. This acts exactly as does bluing
on white goods, leaving the hair a pure
white and not in the least tinged with
yellow.

THE RENAISSANCE.

these illustrated will be satisfactory.
The lace is the revival of Battenberg
braid and buttons built around a cen-
terpiece of Mexican drawn work.

Try These Short Cuts.

There are all sorts of short cuts for
sewing on the market. The endless
task of working buttonholes may be
eliminated by using the worked but-
tonholes, which may be purchased by
the yard at the low cost of 6 cents,
suitable for the little folks' underwear.
They come worked in fine lawn for
shirt waists and the little girl's dresses.
The trying task of sewing on hooks
and eyes is not now necessary, when
they can be bought by the yard ready
to be stitched into place. In making a
fitted lining it is well to sew on these
fastenings before it is fitted in order to
secure a good fit. If the spacings be-
tween the hooks is too wide in some
places where there is a strain it does
not take long to sew a few on at these
points. If, however, you do sew on
hooks and eyes you will find it much
less difficult to keep the thread from
showing through on the right side if
you will slip a piece of whalebone into
the hem. If the hem is too wide for a
whalebone cut a heavy piece of card-
board the proper width and slip that in.

Odds and Ends of Silk.

Look through your bag or box con-
taining odds and ends of embroidery
silks and let them prove useful in or-
namenting guest towels and other
things. It is well to have a few little
towels on hand, not only for home use,
but to be showered on girls whose en-
gagements have been announced. The
most attractive towels can be made by
embroidering across their ends little
flowers. These can be filled in with
French knots made from the various
corded silks. The result is really very
satisfactory.

Maitre d'Hotel Sauce.

One-third cupful butter, ten drops
onion juice, one tablespoonful lemon
juice, one tablespoonful of chopped
parsley, salt and pepper. Beat the but-
ter to a cream and for a cake, add the
lemon juice a little at a time and, when
blended, stir in the parsley, onion juice
and seasoning. Form into a ball or flat
cake and set aside to chill before serv-
ing.

Canine Rudders.

"The dog," said the scientific gen-
tleman, "sometimes steers himself with
his tail."

"Uses it to guide his wandering bark,
does he?" asked the irresponsible
humorist.

Greatly Improved.

Mrs. Mater—Have you seen Mr. Da-
ter's son since he got home from col-
lege? Daughter—Yes, ma; saw him
last night. Mrs. M.—Has he improved
much? Daughter—Awfully. He's got a
moustache.

SO ADORABLE.

the garment hangs from the shoulders,
the true hygienic way. Across the bot-
tom parade delightful kindergarten
people in applique and embroidery.

HOMEMADE BREAD.

How to Make the Staff of Life Quickly and Well.

Break two cakes of yeast into a cup-
ful of water at blood temperature. Put
a tablespoonful of sugar on the yeast
to stimulate its quick growth. While
this soaks, warm two cupfuls of milk
with a cupful of water. This, with the
water over the yeast, makes a quart of
wetting sufficient for four loaves.

In a large mixing bowl put several
sieves of flour and make a depression
in the middle of the flour, in which
put a level tablespoonful of salt and
a heaping tablespoonful of lard. Pour
the liquid and the yeast upon the flour
and mix with the hands, working the
flour from the outside into the liquid in
the middle of the mass. Make a stiff
dough and lift the ball out, putting
away any remaining flour for future
use. If the flour is granular let the
dough lie on the board for ten min-
utes, covered with a warm bowl, that
the flour may properly absorb the
moisture. If the flour is not granular
this wait is not necessary.

Now shape the dough without knead-

ing white goods, leaving the hair a pure
white and not in the least tinged with
yellow.

Pale eyebrows and lashes make a
face expressionless. They can be coax-
ed into a better growth by rubbing the
eyebrows nightly with vaseline and
applying to the roots of both the eye-
brows and eyelashes a tonic made by
mixing five grains of sulphate of quin-
ine with one ounce of sweet almond
oil. Apply this with a fine sable brush,
which comes for the purpose.

Cheap Fruit Cake.

Cream one cupful of sugar and one-
half cupful of butter; then add three
tablespoonfuls of molasses and one
beaten egg, one small tablespoonful of
cinnamon, one teaspoonful of mixed
spices, one cupful of sour milk, with
one teaspoonful of salt to foam; one-
half teaspoonful of salt, one cupful of
chopped raisins, and you may add
citron and chopped figs, which will
make it much nicer; two cupfuls of
flour, adding alternately with the milk
till all is used. Beat thoroughly.
Flour the fruit and bake in a moderate
oven.

Free Muscles.

Garters are, happily, being relegated
to the errors of the past. It stands to
reason that any tightening on such a
busy and important part of the leg is
dangerous, and many men and women
owe varicose veins to the garters of
their youth.

The Only Thing They Ever Did.

John Bright's powers of sarcasm
were almost unrivaled. Some of his
sharpest utterances were against mem-
bers of the nobility. When boasts had
been made of the antiquity of a prom-
inent family, that their ancestors came
over with the Conqueror, his prompt
reply was, "I never heard that they did
anything else."

Salad Supreme.

Arrange lettuce hearts on individual
plates and place in the center of each
one sections of oranges and celery, cut
in Julienne strips. Garnish the top
with chopped English walnuts and
dates cut in small pieces and serve
with a light mayonnaise.

Making the Little Farm Pay

By C. C. BOWSFIELD

As land increases in value and farms decrease in size questions of economical feeding force themselves to the front.

Farmers should grow more root crops as stock feed, for some of these are very rich in feeding value and well adapted to almost all soils. Such crops as mangel wurzels, turnips, artichokes and sugar beets give a big return per acre of some of the best feeding crops on the market. Any little lot in which you have failed to put some early crop will answer the purpose, and the harvesting of the crop is a matter of comparative ease.

Either sugar beets or wurzels, if sown in drills two feet apart in the fore part of June and cultivated, will bring from twenty to thirty tons of rich feed per acre in the average season. They are good feed for both cattle and sheep, being grown extensively for that purpose alone in certain sections. Dig or pull them out if possible before the first freezes, as there is danger of poison being in frozen beets. A cool, damp cellar or pit answers the purpose of storage for winter. A beet chopped into small pieces and fed to the cow with other rations at feeding time seems to add tone and zest to the herd. These sugar beets are especially

SOWING WITH A SMALL SEED DRILL.

relished for their sugar content and are thus one of the most valuable of feeds.

Turnips and carrots make fine stock feed. The hogs especially relish them when once they find they are good and will make high priced meat out of them. And feed of this sort seems to be especially relished by all kinds of stock during the winter season in the absence of silage or other succulent feeds. It is not necessary to cook these if care is taken not to overfeed. Just throw in what they will clean up, and this will always keep their appetite whetted for more.

Many farmers have found artichokes

of great value in pork production. If left to maturity in the fall the hogs can be turned in to harvest the crop, and they will do it at little expense. A hog will eat a great many when he has to root for them, and a drove can soon clean up a good sized lot. They are very prolific, and there is danger they will become a bad weed if not kept well under control. One plant will often produce a rounding up peck measure of tubers. Secure the roots and cut as potatoes, then drop in furrows three feet apart and two feet apart in the row. Cultivate till the bloom begins to show and keep free from weeds. Carrots have high food value for hogs and other stock.

All the more common kinds of roots are greatly relished by horses, cattle, sheep, hogs, chickens and turkeys. Roots are bone, muscle, fat and heat producers and are as good as corn, hay and oats. They keep the system supplied with that necessary fluid that is lacking when dry feed alone is used. Farmers having silos are not much troubled with this problem. Roots have a medicinal value, and every farmer should grow them for his domestic animals.

It goes without saying that if a very heavy crop is desired the land must be put in a superlatively good condition. Manure the land heavily before plowing with rotten stable manure, and there is no danger of applying too much; also use in the drills, about 500 pounds to the acre, a commercial fertilizer containing a relatively high per cent of potash and nitrogen and a low per cent of phosphoric acid. The mangel is but little troubled with pests and insects of any kind.

In our experience low land has always given the best results. Mangels require a deep, friable, cool soil that can be easily worked, while at the same time the roots will find a fairly

compact and cool subsoil.

If only a small patch is to be planted the planting can be most easily done by hand, covering the seed with a hand rake. If an acre or more is to be sown we sow with a small setting it so as to sow five pounds to the acre. We sow rows fifteen inches apart and clean with a hand rake. With horse cultivation we sow not less than thirty in

FARMERS' FOREST NURSERIES.

One Branch of Agriculture That Could Be Followed With Profit.

Forest trees for starting forest plantings and for filling in holes in the wood lot can be grown by farmers at little expense. Large trees are not needed for this purpose. One-year-old seedlings of broad leaf trees are large enough to set out.

Every farm should have a forest nursery for the production of forest trees. The vegetable garden will make an ideal location for a row or two. The trees will thus receive the necessary care and attention the first year.

Recommendations for the planting and care of forest nursery trees show that the first step in starting the forest nursery is to collect the seeds in the fall and keep them over winter for spring planting. Were it not for the damage by mice and other rodents seeds could be planted in the fall.

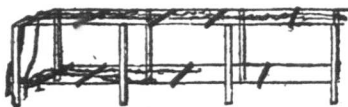

Seeds keep best over winter when stratified in moist sand, and with some varieties this stratifying is necessary. Oak seeds, hickory nuts, walnuts, butternuts, chestnuts, and beechnuts will not germinate if allowed to dry out over winter. Freezing will not injure the seeds, but to prevent drying out they should be kept in a cool place after being stratified in sand.

Tree seeds which have been naturally stratified over winter may often be collected from the ground in the spring, and such will start to grow at once. Oak, tulip, maple, catalpa, black locust, pine, spruce, hemlock, and other evergreens may be preserved over winter by hanging them in bags where they will be dry and exposed to the outside air. Seed should be planted as early as possible in the spring.

Double Decker Berry Trellis.

The sketch shows a trellis which has found favor in blackberry sections. It consists of two parallel rows of 2 by 4 posts set six feet apart in the row, and eighteen inches from each other crosswise. These posts are four feet high, and on the tops of them run heavy gauge wires fastened with staples, writes Mabel I. Whorton in the Farm and Fireside.

Two other wires fastened in the same way are placed on the posts a foot from the ground. A number of notched boards made on the order of a swing board are placed between

the wires, top and bottom, about four feet apart. These boards act as a support to the vines, which are trained to run along the trellis thus formed. The new shoots (next year's bearing vines) as they grow are trained along the under set of boards.

At the end of the season when the old runners are cut away the small boards are easily moved, the new vines lifted to their position of prominence on the top, and the lower boards are again free for the next year's growth.

This method is used a great deal for berries, including the Himalaya blackberry, which sends out such long runners. It is a comfortable height for picking, and a whole field

Farm and Garden

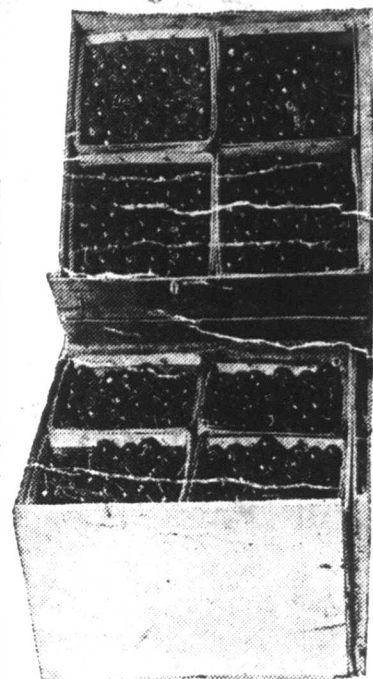

SHIPPING BY PARCEL POST.

Suggestions to the Fruit Grower on How to Pack.

[Prepared by United States department of agriculture.]

Apples are probably our most important fruit crop and lend themselves readily to parcel post marketing. There is a promising field for developing the marketing of fancy eating apples direct from producer to consumer, and every grower should ascertain for himself if he can profitably make this system supplement other methods of marketing. It is necessary, of course, that satisfactory markets be available within a reasonable distance and that local conditions be favorable.

Only varieties of well known merit for eating purposes should be marketed in this way. They should all be well grown specimens, of proper shape and size for the variety, of normal col-

CHERRIES READY FOR SHIPPING.

or, ripe enough to eat (unless the customer wishes to hold them), but never overripe—that is, they should be marketed in their proper season. They should be sound, clean, free from damage of worms or other pests, disease, skin puncture or other defects.

All berries should be shipped as soon after picking as possible. They should not be held over from day to day. They should be picked only when dry, be removed from the sun and kept as cool as possible. Defective and cull berries should be kept separate as the fruit is gathered to avoid further handling for the purpose of sorting. Re-handling does great damage to berries

blackberry, which is gathered to avoid further handling for the purpose of sorting. Re-handling does great damage to berries as well as to cherries and currants.

Example of Labor Efficiency.

Efficiency of farm labor is often as important as its distribution. Two young men were plowing clover sod. Each had two horses hitched to a fourteen inch walking plow. It was heavy plowing, and each team was barely able to plow one and one-half acres a day. One morning the men decided to try three horses on one plow. They did so, and to their great surprise one man and three horses easily plowed three acres per day. They plowed as much as two men and four horses had done and did it much more easily. It was even easier for the driver, because it is always easier to drive a team that is not overloaded. The new arrangement released one man and one horse for other work.

Wanted to Be Joined Right.

They were going out to dinner, and he had gone into the house from his limousine to get her.

"All ready?" he asked, at the foot of the stairs.

"Almost," came the response from above.

"I've asked a friend to join us. Is it all right?"

"Yes, if it's the minister."—
PAGE

Had Terrible Pains in Kidneys and Back.

Dear Mr. Editor—I want to write you about "Anuric." I was very sick, could hardly be up; I was in bed most of the time. Had terrible pains in my kidneys and back, so much so that I had to scream sometimes when I was sitting down and wanted to get up, the pain was so great. I had tried a well-known kidney medicine but it didn't help me. I heard of Dr. Pierce's Anuric Tablets so I thought I would try them. I took only one box of the Tablets, and my back is now free from pain and I can work and take care of my family. I feel I cannot say enough for this medicine. Sincerely, MRS. WM. KELLER.

NOTE: This "Anuric" is adapted especially for kidney complaints and diseases arising from disorders of the kidneys and bladder, such as backache, weak back, rheumatism, dropsy, congestion of the kidneys, inflammation of the bladder, scalding urine and urinary troubles. The physicians and specialists at Dr. Pierce's great Institution, at Buffalo, N. Y., have thoroughly tested this prescription and have been with one accord successful in eradicating these troubles, and in most cases absolutely curing the diseased kidneys.

Patients having once used "Anuric" at Dr. Pierce's Invalids' Hotel, have repeatedly sent back for more. Such a demand has been created that Dr. Pierce has decided to put "Anuric" in the drug stores of this country, in a ready-to-use form. If not obtainable send one dime by mail to Dr. Pierce for trial package or 50 cents for full treatment.

Dr. Pierce's Golden Medical Discovery is a blood cleanser and alterative that starts the liver and stomach into vigorous action. It thus assists the body to make rich, red blood, which feeds the heart, nerves, brain and organs of the body. You feel clean, strong and strenuous.

Strawberries may be picked when sufficiently ripe to reach the consumer in good condition. They should be picked with the hull or cap and the stem on, the stem being pinched off as close to the berry as convenient. The berries should be placed in the boxes as picked instead of being held in the hand until a handful is gathered. Small, inferior, dirty and overripe berries should be placed in separate boxes as picked, but should not be sent to market. The quality and size should be the same from top to bottom and the boxes well filled. Topping or facing the boxes with the larger fruit should not be done, but turning down the stems of the top layer improves the appearance of the package. No leaves, sticks, long stems or other trash should be allowed to get into the boxes. Dewberries and blackberries should be picked only when dry and should be handled as little as possible. They are ripe enough when a full, bright black, but for parcel post marketing should not be allowed to become too ripe. All undesirable ones should be kept out as the berries are picked. It is very important that peaches be handled carefully at all times to prevent bruising. For shipment by parcel post they should be about ripe, but only "hard ripe," ready to eat in not less than two days. Varieties and colors should not be mixed unless so ordered.

Pears should not be picked so ripe as some other kinds of fruit because they bruise and turn black so easily. In fact, it is advisable to pick most varieties when matured, though green, or just starting to ripen. If picked when just turning they should reach the consumer about right to use. They should be free from worms, bruises and cuts, practically free from disease, specks, blemishes and other defects and should be of proper shape and size for the variety. No fruit off the ground should ever be shipped.

Plums may be picked so that they will reach the consumer just ready to use. Careful handling will prevent decay in shipping. Undersized fruit should be sorted out. Cracked, ill shaped, off colored or otherwise defective plums should be culled out, and no overripe fruit should be overlooked, for a decaying plum wets all those around it and causes them to rot.

Special care must be taken to see that raspberries are picked only when dry and while they are still firm. They should be carefully handled, graded as picked and never rehandled. Boxes should be well filled, as they have a decided tendency to settle down in shipping because of their cuplike shape.

Coms to Newcastle.

Mother was measuring a dose of tonic for her little son, who looked up and said:

"What am I taking this for?"

"An appetite," she replied.

"An appetite," he scornfully repeated. "I can't begin to hold now one-half I want to eat."

Capt. Sneath Recovering.

The suspense concerning the extent of the injuries to Capt. Sneath was considerably relieved by the receipt of a message from him on the 8th instant. On the 18th of May he was taken to a hospital at Boulogne in an unconscious condition suffering from shell shock. He was deaf and badly shaken up but in the course of a week was able to be removed to Hyde Park Hospital in London, where he is steadily improving and hopes in the course of a few weeks to be able to rejoin his battalion which has sustained very heavy losses during the past week. His injuries were received from the explosion of a shell among a group of five officers. Two were killed outright and the other three were knocked over and buried under a great weight of earth from which they were, with difficulty, extricated more dead than alive.

THE GRAHAM CO'Y.

Napanee, Ont.

Annual Sunday School picnic will be held in Allen Oliver's grove on Tuesday next, June 13th. Refreshments served on the ground. Base ball game, and a fish pond. Admission, adults, 25c, children 15c.

The last regular monthly meeting until the Autumn, of the "U.E. Loyalist" Chapter I.O.D.E., will be held in the Board-room of the Public Library, on Monday, 12th June, at 4.15 p.m. Delegate's Report will be given, and as some important matters are to be discussed, a full attendance of members is desired.

SECRETARY.

The annual S.S. Convention of Richmond Township, will be held at Forest Mills on Friday, June 16th, 1916: two sessions at 2 and 7.30 p.m. A general review of the year's work by the Field Secretary. Short addresses by several from the town and township, who are interested in S.S. work. Music by Roblin and Lime Lake choirs. Everybody invited. See bills for program.

The local firemen are busily engaged getting their running team in shape for the Firemen's Demonstration at Trenton, on July 26th. Considerable funds are needed for this purpose and Mr. Jas. Foster has kindly consented to help the boys out by giving them a benefit concert at Wonderland, on two nights, Thursday, June 15th, and Tuesday, June 20th.

The U.E.L. Chapter, I.O.D.E., observed the King's Birthday this year very fittingly by the presentation of a beautifully framed copy of the famous 'Scrap of paper.' After the principal's few introducing remarks about the former frequent kindnesses shown to the Collegiate by the chapter. The Regent, Mrs. Harshaw, made the presentation with a short appropriate address. The presentation had particular significance as the names of former students and teachers who have enlisted are enrolled on each side the historic document.

London, June 8.—The German official statement received in Amsterdam to-day admits the sinking of the large battle cruiser Lutzow and the small cruiser Rastock in the Skaquak naval engagement. These boats sank on their way to harbor after the battle. Earlier mention of their losses was not made, say the despatches, because of "military considerations." The admission of the loss of the Lutzow and Rastock brings the total German loss admitted to date to twelve ships, 65,000 tons.

1916, at 2.30 o'clock. Subject—"Economy in Foods." Collins Bay Branch, Mrs. J. B. Fairfield's lawn, June 13th, 1916, at 2.30 o'clock. Subject—"Dry Cleaning." Miss Hayes took the Normal Teachers' Course in Domestic Science at the MacDonald Institute, Guelph, after considerable experience as a public school teacher. Following this she has conducted several Demonstration Lecture courses in food values and cooking with uniform acceptance to the Institutes. At the close of each meeting "Afternoon Tea" will be served by the members of each branch. The public are cordially invited.

The Red Cross Society

Last year an appeal was made to the Collegiate Institute for a donation of money, and was met with a hearty response, one of the most successful Bazaars ever held in Napanee being given, and the net proceeds handed to our Society. This year a second appeal was made. A short time ago the Collegiate held a delightful concert, the Town Hall being filled to its utmost capacity and the sum of \$65.00 was placed in the hands of our treasurer to be applied on the Prisoners-of-war Fund.

We feel deeply indebted to Mr. McLean, Principal, to his faithful Assistants, and to the pupils one and all, who have shown such keen interest in our Red Cross work.

The Convenor of the Finance Committee, reports successful returns last month from the Mite Boxer. This is very encouraging, as we depend largely on the money raised in this way, to meet the financial part of our work.

The Society's one aim is to spend the money collected, in such a manner, that the greatest benefit shall be secured at the least possible outlay. The comforts purchased with this Mite Box money and sent away from time to time, have meant already untold blessings to untold numbers of wounded men; these comforts have alleviated suffering of the most terrible characters; they have prevented sufferings, which otherwise must have taken a heavy toll of life; they have made easy the way of the dying, and brought comfort and hope to those who had become victims of despair. We would ask for further help, that we may feel when this great war is over, that we have each one done our "bit" and given aid and comfort to those who so badly need it.

We acknowledge with thanks \$2.00 from Gretna Sunday School and \$11, the proceeds of an Entertainment, gotten up by Miss Jaynes, of Sharp Corners.

The Society is greatly indebted to Mr. R. B. Allen of Napanee, who, on many occasions, has furnished us with a phonograph, entirely without fee. This kindness is greatly appreciated.

We hope to see a good attendance at our rooms on Saturday. Tea will be served in the afternoon.

Nickle plated ware, brass goods electric lamps, fire place fenders and bread boards at BOYLE & SON'S

June 10th. Silver collection body welcome.

POULTRY.

To anyone who not carlowed the direction of poultryment in Canada, an under the status which the poultry has now reached must come distinct surprise. Whether from the standpoint of the of the produce trade, it is n the best organized and m gressive of any of our live dustries. Co-operation am mers in marketing is impr product and realizing for er price than they have hit able to obtain. The reorgan methods by the trade is against loss in handling, is to the consumer a better ar establishing our export busi a firm basis.

It is estimated that Can Cuba, during the last two received from the United St three-fourths of all the eggs by that country during th This situation, however, changed. As against an in in 1913 of 13,240,111 dozen ported in 1915 not more th 952 dozen. On the other h in 1913 we exported only 14 en, in 1915, we exported dozen. This constitutes a n in production, in two yea least 17,100,000 dozen. Prac of these exports went to t Kingdom.

Notwithstanding the surpl ada which these figures prices during March, April have remained at an extr high level. For the first q the year 1916, the price to selling co-operatively, has least 4c. in advance of the ceived, for the same period For the month of March, i least 5c. in advance and month of April at least 3 vance of last year's price respective months. The de eggs for local consumption, age purposes and for imme port, has rarely been so ke the present moment. This clearly reflected in the quoted. Heavy domestic cc in the face of the high meats, partly explains th Confidence in the export d the part of the produce t firms it from another direc withstanding increased l the egg and poultry busine ada is in a very strong po the present time.

Under the circumstances lieve that it will be a practice to raise as many it is possible or practicable. Early hatched chicks m winter layers. Rough grain bably be produced in abu Canada this year and the poultry at a profit should b ly assisted from this source winter prices are a paying tion, in any event. Poultry dressed, under present ar tive market conditions, c tionably be reared and fini decided profit. A good flo try, if carefully handled, wi prevent waste on the farm mote economy in living such as is particularly when all farm products ar so marketable and so dear

PERSONALS

Misses Ida Garbutt and Malene, of
Kingston, were in town on Monday.

Miss Rose Frizzell is spending the
week with friends in Belleville.

Messer, Charles V. F. Meagher and
Geo. H. Meagher and two friends of
the Ritchie Co., motored to town on
Sunday.

Mrs. A. E. Lewis, Odessa, who has
been ill, is improving. Her daughter,
Mrs. F. G. Henderson, Hamilton, who
has been with her, intends to return
home the last of the week.

Mr. and Mrs. Campbell Clark, of
Hamilton, spent last week with his
mother, Mrs. A. C. Clarke.

Miss Marjorie Doller is home from
Buffalo, N. Y.

Mr. J. E. Robinson, Delegate from
Trinity Church, to Methodist Confer-
ence at Peterboro', was again elected
Secretary of The Laymens' Associa-
tion.

Mr. and Mrs. A. C. Baker, spent the
week end in Belleville attending the
Rice-Sinclair wedding.

Mr. and Mrs. Chester Brown are
spending to-day in the village of En-
terprise, with their daughter, Mrs.
Reuben Wagar, it being Mr. Brown's
81st birthday.

Mr. and Mrs. Manly Jones attended
the Methodist Conference in Peter-
boro and visited at the home of F. O.
Allison.

Rev. W. H. Emsley, senior Chaplain
at Bramshott camp has been promot-
ed to Lieut.-Colonel.

Miss Mercer, the Kingston nurse,
with the Canadian forces, received the
Royal Red Cross on the King's birth-
day.

Mrs. Jas. Daly returned this week
from spending the winter in Buffalo.

Mrs. J. J. Graham and family left
last Friday for Kingston where they
have taken a home on Alfred street.

Mrs. Edwin Miller spent the past
week with friends in Watertown, N. Y.

Rev. S. Sellery will close his pasto-
rate of Trinity Church on Sunday,
June the 18th.

Mr. and Mrs. D. B. Morgan and
baby, Panama, are guests of her par-
ents, Mr. and Mrs. W. H. Hunter.

During Mrs. Willoughby Cum-
mings stay in town this week, she will
be the guest of Mr. and Mrs. A. T.
Harshaw at "Hillcrest."

Miss Ethel Asselstine arrived home
from Middletown, N. Y., and is visit-
ing her sister, Mrs. Gray, Sydenham.

Miss Constance Nesbitt, nurse-in-
training, Kingston General Hospital,
spent the week-end with her parents,
Mr. and Mrs. D. A. Nesbitt.

Sergt. Bruce Jemmett, Engineers,
son of Mrs. Jemmett, Napanee, has
won the distinguished conduct medal
for services in the field. His name

The Scarcity of Rennet

Tamworth, Ont.

June 6th, 1916.

Hon. Martin Burrell,
Minister of Agriculture,
Ottawa, Canada.

Dear Mr. Burrell:—You have no
doubt been made acquainted with the
serious condition of the cheese dairying
in the Dominion of Canada on
account of the so said shortage of
rennet.

As I am directly interested in the
cheese dairying, owning and operating
four factories, manufacturing for some
three hundred and twenty-five farm-
ers, my output in dollars is between
seventy-five and one hundred thous-
and for a season, but I am not speaking
for myself personally as I have a fair
supply at present on hand, but know-
ing the conditions, I am speaking for
the dairy industry in general as I per-
sonally know some of the factories in
this community cannot operate any
longer than to finish out this present
week, unless they get relief by secur-
ing more rennet, in fact I have come
to the relief of one or two factories by
loaning them a few gallons of rennet
or they would of been closed this
week.

Now as you are aware, if the indus-
try had to close it would be a very
serious matter. The output for this
season, from present prospects, would
be in round figures between twenty-
five and thirty millions, but it is not
only a matter of dollars to Canada,
but it is as you are aware, as necessary
to supply our boys, who are fighting
in the trenches in defence of the Em-
pire, with cheese as a food as it is
bread.

If you have not already done so I
think that you should take this matter
up and ascertain, if there is a shortage
or if the supply has fallen into the
hands of a few fakers in order to make
fortunes. If you find that this is the
condition, I feel that it would be your
duty to take possession of every gal-
lon of rennet and see that it is pro-
perly distributed among the manufac-
turers. While I believe they are sell-
ing a few gallons from ten to fifteen
dollar, per gallon, yet it is not a mat-
ter altogether with the farmers and
manufacturers of the price it is a
matter of getting the article for which
cheese cannot be manufactured with-
out.

Hope and believe you will take this
matter up with the department.

Yours truly,

W. J. PAUL,

M. P. Lennox and Addington.

NOTICE.

You will have no trouble in raising
little chicks or turkeys if you feed

Women's Patriotic Service and Red Cross Work

Through the "U. E. Loyalist" Chap-
 ter, I.O.D.E.

In the recent news that has come to
 us from the war area, our souls have,
 and are still being tried, as it were in
 the fiery furnace, and our courage
 and endurance put to the testing
 point.

In the grave situation we are facing,
 do not let us be found wanting, let
 each one do their bit, then all will be
 taking their part in the Empire's Con-
 flict for the freedom of Europe, the
 liberty of the world, and the only way
 in which a lasting peace may be ob-
 tained.

Think of the crying needs resulting
 from the recent engagements both by
 sea and land! Indeed the encounters by
 land are as fierce as ever, if not more
 so, and while our national existence is
 at stake, our brave defenders are in
 need of countless supplies and com-
 forts—but hospital supplies and surgi-
 cal dressings above all other require-
 ments.

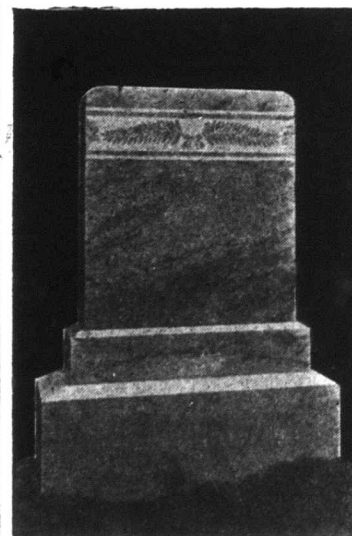

Let us therefore do our utmost to
 step into the breach in the only way
 we can, by seeing to it that our men
 do not suffer from the lack of es-
 sentials.

Fresh hospital supply cases are be-
 ing prepared, and we ask each mem-
 ber to do her utmost to assist in mak-
 ing it possible to fill and ship them.

See another column for announce-
 ment of Mrs. Willoughby Cummings'
 lecture at Town Hall to-night. All
 members and friends are expected to
 be present. Remember our room is
 open twice a week, on Thursday and
 Saturday afternoons, until 5.30 o'clock
 when work is going on, and we are
 prepared to receive donations either
 in funds or materials.

A 25c. bottle of Nylas "Death to
 Bugs" will rid your house of bugs
 and cockroaches. WALLACE'S Drug

"MADE IN CANADA"

Ford Touring Car
 Price \$530

If you stayed indoors all winter—you
 might not need your Ford 'till "new
 grass" time. But in the wide "out-of-
 doors" the Ford serves as well in
 January as in June. It's the all-year-
 round car with a reputation for service
 and economy that isn't affected by the
 seasons.

The Runabout is now \$480; the Town Car \$780;
 f. o. b. Ford, Ontario. All cars completely equip-
 ped, including electric headlights. Equipment
 does not include speedometer. Get particulars
 from W. J. NORMILE, Dealer, Napanee, Ont.
